Sommario/riassunto	This book provides exclusive information on how agribusinesses could act as the springboard for inclusive economic growth critical for socioeconomic transformation of Africa. It is a must read for academics, practitioners, policymakers, students, and all those interested in the application of practical models capable of tackling the endemic poverty situation in Africa using agribusiness as the launchpad. The book emphasizes the urgent need for robust and inward-looking enabling policy frameworks to help remove existing

constraints on agro-industrialization and encourage investments. Thus, the book sets the agenda for the right combination of agricultural, industrial, and trade policies critical in promoting sustainable agricultural commodity value chains and food systems for inclusive growth and poverty reduction. Written in a simple, plain, and accessible language devoid of technical jargons, the book makes an interesting read for even the non-expert and is a valuable reference material for academic and practical training of students and practitioners. Margaret Atosina Akuriba holds a Ph.D. in Development Economics from Wageningen University and Research, Netherlands. She is a senior lecturer at the School of Applied Economics and Management Sciences of the University for Development Studies, Ghana. Mamudu Abunga Akudugu holds a Ph.D. in Livelihoods (International and Rural Development) from University of Reading UK and M.Phil. in Agricultural Economics from the University of Ghana. He is a multidisciplinary academic at the Institute for Interdisciplinary Research, University for Development Studies, Ghana. Abdul-Razak Alhassan holds a Ph.D. in Development Policy and Management from the University of Manchester. He is an academic at the Department of Strategy and International Business, Surrey Business School, University of Surrey. .
