

1. Record Nr.	UNINA9910506401203321
Titolo	Sustainable production and applications of waterborne polyurethanes / / edited by Inamuddin, Rajender Boddula, and Anish Khan
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-72869-2
Descrizione fisica	1 online resource (192 pages)
Collana	Advances in Science, Technology and Innovation
Disciplina	668.4239
Soggetti	Ecology Materials science Engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Contents -- 1 Waterborne Polyurethanes for Corrosion Protection -- Abstract -- 1 Introduction -- 1.1 Effect of Corrosion on the Economy and Potential Market for Corrosion Inhibitors -- 1.2 Types of Corrosion Inhibitors -- 1.3 Polymers for Corrosion Inhibitors -- 2 Waterborne Polyurethanes for Corrosion Protection -- 2.1 Composite Coatings Based on Waterborne Polyurethanes and Graphene -- 2.2 Composites Based on Waterborne Polyurethanes and Metal Oxides for Corrosion Inhibition -- 2.3 Coatings Based on Composites of Waterborne Polyurethanes and Conducting Polymers -- 2.4 Coatings Based on Nanocomposites of Waterborne Polyurethanes -- 3 Conclusion and Future Lookout -- References -- 2 Waterborne Polyurethane-Polyacrylate Hybrids -- Abstract -- 1 Introduction -- 2 Polyurethane-Polyacrylate Hybrids Preparation -- 2.1 Polyurethane-Polyacrylate Separately Preparation -- 2.2 Polyurethane-Polyacrylate In-Situ Preparation -- 3 Waterborne Polyurethane-Polyacrylate Hybrids (WPUAHs) Preparation -- 4 Waterborne Polyurethane-Polyacrylate Hybrids (WPUAHs) Applications -- 5 Conclusion -- References -- 3 Applications of Cationic Waterborne Polyurethanes -- Abstract -- 1 Introduction -- 2 Materials and Methods Used for Cationic Waterborne Polyurethanes -- 3 Applications of Cationic Waterborne Polyurethanes -- 3.1 Biomedical Applications -- 3.2 Biodegradable Coatings -- 3.3

Weather Protective Coating -- 3.4 Coatings for Corrosion Protection -- 3.5 Electrical and Electronic Applications -- 3.6 Flame Inhibition Coatings -- 3.7 Sensors -- 3.8 Shape Memory -- 3.9 Coatings for Other Applications -- 4 Concluding Remarks and Future Perspective -- References -- 4 Waterborne Polyurethanes Additive Technologies -- Abstract -- 1 Introduction -- 2 Structure of WBPUs -- 3 Properties -- 3.1 Non-adhesive Behaviour of WBPUDs -- 3.2 Rheological Properties of WBPUs -- 3.3 Effect on the Performance of Two-Component WBPUs Additive Coatings -- 3.4 WBPUs with High Solid Content and Elasticity -- 4 Application -- 4.1 Graphene-Modified WBPUs Materials -- 4.2 Antiglare (AG)WBPUs -- 4.3 Functionalized WBPUs-Based Graphite-Reinforced Composites -- 4.4 Polydimethylsiloxane (PDMS)-Modified WBPUs -- 4.5 WBPUs/hydroxyapatite Chemical Hybrids -- 4.6 WBPUs-Acrylate modified Epoxy Resin -- 4.7 Antistatic WBPUs Coating -- 4.8 Fluorinated WBPUs -- 4.9 Hyperbranched WBPUs -- 4.9.1 Polyurethane Acrylate (PUA) Modified WBPUs -- 5 Conclusion -- Acknowledgements -- References -- 5 Waterborne Polyurethanes in Sustainability Development -- Abstract -- 1 Introduction -- 2 Sustainable Routes for Polyurethane Dispersion -- 2.1 Prepolymer Emulsification Process -- 2.2 Acetone Process -- 2.3 Melt Dispersion Process -- 2.4 Self-Dispersing of Solids Process -- 2.5 Ketimine Process -- 2.6 Ketazine Process -- 3 Renewable Resources for Waterborne Polyurethane -- 4 Applications of Waterborne Polyurethane -- 5 Concluding Remarks and Future Perspective -- References -- 6 Properties and Characterization Techniques for Waterborne Polyurethanes -- Abstract -- 1 Introduction -- 2 Bio-Based Water Polyurethanes -- 2.1 Synthesis of WBPUs -- 2.2 WBPUs Synthesis from Cellulose Nano-Fibers -- 3 Synthetic Water Polyurethanes -- 4 Self-Healable Waterborne Polyurethanes -- 5 Water Polyurethanes Adhesives -- 6 Water Polyurethanes Coatings -- 7 Waterborne Polyurethane Nano-Composites -- 8 Castor Oil-Based WBPUs Nano-Composite Coatings -- 9 Conclusion -- References -- 7 Novel Research Areas of Applications for Water Borne Polyurethanes -- Abstract -- 1 Introduction -- 2 Specific Examples of Application for Water Borne Polyurethanes -- 3 Water Borne Polyurethanes as Adhesives -- 4 Water Borne Polyurethane Ink Binder -- 5 Water Borne Polyurethane Coatings. 6 Water Borne Polyurethane Leather -- 7 As Novel Material for Wound Plastering and Other Clinical Usage -- 8 Conclusion and Future Recommendation to Knowledge -- References -- 8 Applications of Polymeric Materials in Biomedical Engineering -- Abstract -- 1 Introduction -- 2 Chemistry of Polyurethane -- 3 Waterborne Polyurethane -- 4 Synthesis of Polyurethane -- 4.1 Polyols -- 4.2 Isocyanates and Non-isocyanates -- 4.3 Catalysts -- 4.4 Chain Extenders and Cross-Linkers -- 4.5 Surfactants -- 5 Carbohydrates Incorporated Polyurethane -- 5.1 Potential of Carbohydrates in Polyurethane -- 5.2 Role of Carbohydrates in Polyurethane -- 5.3 Role of Carbohydrates in Polyurethane as Filler -- 5.4 Role of Carbohydrates in Polyurethane as Cross-Linkers -- 6 Characterization of Carbohydrates Incorporated Polyurethane -- 7 Applications of Polyurethane in Biomedical Science -- 8 Conclusions -- Acknowledgements -- References -- 9 Applications of Waterborne Polyurethanes Foams -- Abstract -- 1 Introduction -- 2 Production of Polyurethanes -- 3 Polyurethane Foams (PUF) -- 3.1 Solvent-Based Polyurethane Foams and Waterborne Polyurethane Foams -- 4 Applications of Waterborne Polyurethane Foams -- 4.1 Reticulated Waterborne Polyurethanes (RWPU) Applications -- 4.2 Construction Applications -- 4.3 Waterproofing Applications -- 4.4

Textile/Fabric/Carpet Industry Applications -- 4.5 Leather Industry Applications -- 4.6 Foot Wear Industry Applications -- 4.7 Automobile Industrial Applications -- 4.8 Furniture Industry Applications -- 4.9 Refrigeration Applications -- 4.10 Separation Process Applications -- 4.11 Medical and Biotechnological Applications -- 4.12 Foam Adhesive Applications -- 4.13 Other Applications -- 5 Strategies Towards Sustainable Production and Applications -- 5.1 Production of Polyols Through Renewable Resources. 5.2 Production of Isocyanates Through Renewable Resources -- 5.3 Recycling of Foams -- 6 Summary -- References -- 10 Water-borne Polyurethane-Metal Oxide Nanocomposite Applications -- Abstract -- 1 Introduction -- 2 Different Types of Reinforcement of Water-Borne Polyurethanes (WPU)s Using Metal Oxide Nanomaterials -- 2.1 Fe<sub>3</sub>O<sub>4</sub>-water-borne Polyurethanes (WPU) for Tissue Engineering and Control Drug Delivery Applications -- 2.2 ZnO-Water-Borne Polyurethanes (WPU) as an EMI Shielding Material -- 2.3 TiO<sub>2</sub>-water-borne Polyurethanes (WPU) as a Biomimetic Material for Stem Cell Applications -- 2.4 SiO<sub>2</sub>-water-borne Polyurethanes (WPU) for Adhesive Applications -- 2.5 SnO<sub>2</sub>-Water-Borne Polyurethanes (WPU) for Thermal Insulation Applications -- 3 Conclusions -- Acknowledgments -- References -- 11 Waterborne Polyurethanes for Biomedical Applications -- Abstract -- 1 Introduction -- 2 Studies on Application of Polyurethane in Medical Field -- 3 Wound Dressings and Plasters -- 4 Tissue Engineering Scaffolds -- 5 Drug Delivery with Nanocapsules Plus Nanoparticles -- 6 Bone Regeneration -- 7 Catheters Polyurethane -- 8 Contact Lenses -- 9 Conclusion and Future Recommendation to Knowledge -- References -- 12 Biomedical and Environmental Applications of Waterborne Polyurethane-Metal Oxide Nanocomposites -- Abstract -- 1 Introduction -- 2 Overview of Waterborne Polyurethane -- 3 Waterborne Polyurethane-Metal Oxide Nanocomposites -- 3.1 Magnetic Metal Oxide Nanoparticles -- 3.2 Non-magnetic Metal Oxide Nanoparticles -- 4 Biomedical Applications -- 5 Environmental Applications -- 6 Future Perspectives -- 7 Conclusions -- References.
