Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (97 pages)
Collana	Palgrave Pivot
Disciplina	352.88
Soggetti	Social policy Science - Social aspects Anthropology Sociology Social Policy Science and Technology Studies
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. Introduction -- 2. What is Open Data? Historical and Instrumental Perspectives -- 3. Comparing Open Data Programs in Victoria, Australia -- 4: Working in Open Data -- 5: Open Data Futures.
Sommario/riassunto	This book looks at open data practices historically and from the perspective of those currently involved in advocating for making government data freely available. Based on interviews with practitioners, users and evangelists across three Australian-based case studies illustrating contemporary open data practices, this book discusses how open data has evolved, why certain barriers to openness exist and what the future of open data might look like. It highlights both the challenges and approaches to 'best practice' in government departments and agencies as they adapt to changing data ecosystems and public expectations around access, transparency, risk and responsible stewardship. Suneel Jethani is a Lecturer at the University of Technology Sydney. His research centers on embodied technology, datafication and issues of technology ethics, governance, and design.

He is the author of *The Politics and Possibilities of Self-Tracking* (Emerald, 2021). Dale Leorke is a Senior Research Fellow at Tampere University, Finland. His research examines the impact of digital technologies on public space. His previous books include *Location-based Gaming: Play in Public Space* (Palgrave, 2018), *Public Libraries in the Smart City* (Palgrave, 2018) and *Games and Play in the Creative, Smart and Ecological City* (Routledge, 2020).
