

1. Record Nr.	UNINA9910506405403321
Autore	Li Bocong
Titolo	An introduction to the philosophy of engineering : I create, therefore I am / / Bocong Li
Pubbl/distr/stampa	Berlin, Germany : , : Springer, , [2021] ©2021
ISBN	3-662-64088-0
Descrizione fisica	1 online resource (259 pages)
Collana	Philosophy of engineering and technology ; ; Volume 39
Disciplina	620.001
Soggetti	Engineering - Philosophy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- A Philosophical Reflection of the Humanized Natural World: Foreword to the Chinese Edition -- Making Engineering into Philosophy: Foreword to the English Edition -- Translator's Introduction -- References -- Contents -- 1 Introduction -- 1.1 Previous Philosophical Attempts to Explore the Theme of Human Creation -- 1.1.1 European Philosophers' Attempts to Explore the Theme of Human's Creation in History -- 1.1.2 Chinese Philosophers' Attempts to Explore the Theme of Human's Creation in History -- 1.2 Heralding the Rise of the Philosophy of Engineering -- 1.2.1 The Burgeoning Philosophy of Engineering and Technology -- 1.2.2 The Second Rise of the Philosophy of Technology and the Advent of the Philosophy of Engineering -- 1.3 Triism or Trichotomy of Science, Technology, and Engineering -- 1.3.1 Critical Questions at the Gateway to Philosophy of Engineering -- 1.3.2 Triism or Trichotomy of Science, Technology, and Engineering -- 1.3.3 "I Create, Therefore I Am" as a Maxim for Philosophy of Engineering -- 1.4 A Columbian Voyage in the Philosophical World and the Main Concepts of Philosophy of Engineering -- 1.4.1 The Establishment of Philosophy of Engineering as a Columbian Voyage -- 1.4.2 The Three Phases of Engineering Process and the Main Concepts of Philosophy of Engineering -- References -- 2 The First Stage of Engineering Activity: Planning and Decision-Making -- 2.1 Telos, Goal-Setting, and Goal-Orientation -- 2.1.1 Telos, Teleology, and Causality -- 2.1.2 The Classification

of Goals and Their Determination -- 2.1.3 Goal Orientation
 and the Purpose of Organization -- 2.2 Initial and Environmental
 Factors, Constraints and Expected Conditions -- 2.2.1 Initial
 and Environmental Factors -- 2.2.2 Investigation into and Identification
 of Initial and Environmental Conditions -- 2.2.3 Constraints
 and Expected Conditions.
 2.3 Knowing Yourself, Understanding the Situation, and Seizing
 Opportunities -- 2.3.1 Knowing Yourself in Philosophy of Engineering
 -- 2.3.2 Analysis and Judgment of Situations as Power Contrast,
 Strategic Potential, and Future Trends -- 2.3.3 Discerning, Capturing
 but not Missing an Opportunity -- 2.4 Operations Research, Risk,
 and Decision-Making -- 2.4.1 Operations Research: Rules and Methods
 -- 2.4.2 The Nature of Risk and the Attitudes Toward It -- 2.4.3
 Decision Makers, Elements of Decision Making, and Pre-evaluation --
 2.5 Ideas, Rationality, and Traps in Decision Making -- 2.5.1 Supreme
 Good and Ideals -- 2.5.2 Rationality: Instrumental Rationality
 and Substantive Rationality -- 2.5.3 Errors in Planning and Traps
 in Decision Making -- References -- 3 The Second Stage of Engineering
 Activity: Operating and Implementing -- 3.1 Natural Resources, Raw
 Materials, and Machines -- 3.1.1 Naturalistic Theory of Matter
 and Axiological Theory of Matter -- 3.1.2 The Infinity of Natural Matter
 and the Finiteness of Natural Resources -- 3.1.3 The Nature of Matter
 and the Potential of Raw Materials -- 3.1.4 Tools and Machines
 as the Means of Actualization -- 3.1.5 All Roads Lead to Rome and One
 Road Leads to Many Cities -- 3.1.6 Machines and Tools as Device
 Paradigms and the Extension of Human Organs -- 3.2 Operations,
 Procedure, and Micro Modes of Production -- 3.2.1 Semantics
 and Usage of Production and Operation -- 3.2.2 Operations: Bridgman,
 Piaget, and Management Science -- 3.2.3 Command, Operations,
 and Operational Interface -- 3.2.4 Unit Operation and Operation
 Procedure -- 3.2.5 Operational Types, Procedural Modes, and Micro-
 production Modes -- 3.3 Organizations, Institutions, and Rules --
 3.3.1 Institutional Economics and Institutions -- 3.3.2 Institutions,
 Organizations, and Rules -- 3.3.3 Rules and Scientific Laws.
 3.3.4 Semantic Analysis of the Popular Chinese Saying "Do as Objective
 Scientific Law Requires" -- 3.3.5 Rules: Make Them, Break Them,
 or Follow Them -- 3.3.6 Institutional Arrangements, Institutional
 Environment, and Institutional Running -- 3.4 Management, Incentives,
 and Control -- 3.4.1 Ownership, Managing Power, and Contract --
 3.4.2 Management, Position Function, and Responsibility -- 3.4.3
 Leadership, Incentive, and Interpersonal Relationships -- 3.4.4 Control,
 Feedback, and Standards -- 3.5 Efficiency, Will, and Labor as a Mode
 of Existence -- 3.5.1 Labor and Human Existence -- 3.5.2 Finiteness,
 Efficiency, and Equity -- 3.5.3 The Process of Labor and the Concept
 of Will -- References -- 4 The Third Stage of Engineering Activity:
 Using Artifacts and Living a Life -- 4.1 Value, Transaction,
 Communication, and Intersubjectivity -- 4.1.1 The Correlation
 between the Economic Concept of Value and the Philosophical Concept
 of Value -- 4.1.2 Exchange, Transaction, and Communication -- 4.1.3
 Three Major Mediums of Modern Social Communication -- 4.2
 Consumption and Use of Artifacts -- 4.2.1 Types of Consumption
 and Consumer Behavior -- 4.2.2 Interpersonal Relationships
 in Consumption Types and Consumer Behavior -- 4.2.3 The Human-
 Made Thing, or Artifact, as a Semi-Thing-in-Itself -- 4.2.4 I Use
 Artifacts, Therefore I Am -- 4.3 Cause, Effect, Purpose, and Alienation
 -- 4.3.1 Purpose and Consequence -- 4.3.2 Alienation of Artifacts --
 4.3.3 Alienation of Signs -- 4.3.4 Alienation of Human -- 4.3.5
 Purpose and Consequence Revisited -- 4.4 Life and Freedom -- 4.4.1

Life Content and Lifestyle -- 4.4.2 Being Digital and Poeticized Life --
4.4.3 Freedom and the Community of Free Individuals -- References --
5 Philosophy of Engineering: An Emerging Branch of Philosophy -- 5.1
The Relationship Between Philosophy of Engineering and Other
Disciplines.
5.1.1 The Relationship Between the Philosophy of Engineering
and the Philosophies of Science, Technology, and Society -- 5.1.2 The
Relationship between Philosophy of Engineering, History
of Engineering, and Sociology of Engineering -- 5.1.3 The Relationship
Between Philosophy of Engineering and Interdisciplinary Engineering
Studies -- 5.2 Some Key Philosophical Issues from the Perspective of
Philosophy of Engineering -- 5.2.1 A New Understanding of Human
Nature: From Human Being as Rational Animal to Human Being
as Engineering Animal -- 5.2.2 A New Form of Philosophy: From
World-Interpreting to World-Changing -- 5.2.3 Engineering Thinking
and Engineering Knowledge -- 5.3 The Theories of Two Worlds, Three
Worlds, and Four Worlds -- 5.3.1 Plato's Theory of the "Two Worlds"
and Popper's Theory of the "Three Worlds" -- 5.3.2 The Theory of Four
Worlds in Philosophy of Engineering -- 5.4 Home Constructing,
and Harmony Among Heaven, Earth, and the Human -- 5.4.1 The Life
Turn in Western Philosophy in the 20th Century -- 5.4.2 A Reflection
on Home and Its Reconstructing -- 5.4.3 The Harmony of Heaven,
Earth and Humans -- References -- Index.
