

1. Record Nr.	UNINA9910508430903321
Titolo	Business models for sustainability transitions : how organisations contribute to societal transformation // editors, Annabeth Aagaard, Florian Ludeke-Freund, Peter Wells
Pubbl/distr/stampa	Cham, Switzerland : , : Palgrave Macmillan, , [2021] ©2021
ISBN	3-030-77580-1
Descrizione fisica	1 online resource (XXXIII, 368 p. 23 illus. :)
Disciplina	658.408
Soggetti	Social responsibility of business Industries - Social aspects Sustainable development Industrial management - Environmental aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Foreword: A Transitions Perspective -- Foreword: A Business Models Perspective -- References -- Contents -- Notes on Contributors -- List of Figures -- List of Tables -- Introduction to Business Models for Sustainability Transitions -- 1 Why a Book on Business Models for Sustainability Transitions? -- 2 Business Model for Sustainability Perspective -- 3 Sustainability Transitions Perspective -- 4 Business Model Innovation and Sustainability Transitions -- 5 The 'Spiral' of Business Models for Sustainability Transitions -- 6 Themes and Chapters Contained in This Book -- 7 Summary and Outlook -- References -- Part I: Crossing the Chasm: Integrating Business Model and Sustainability Transition Perspectives -- Transformative Business and Sustainability Transitions: A Framework and an Empirical Illustration -- 1 Introduction -- 1.1 Sustainable Business Models -- 1.2 Sustainability Transitions -- 1.3 Transformative Business Model Framework -- 2 Methods -- 2.1 Transition Pathways for the Dutch Agri-Food System -- 2.2 Business Cases -- 2.3 Analysis -- 3 Results -- 3.1 Added Value with and for the Countryside -- 3.1.1 Business Cases -- 3.1.2

Transformative Business Model Ideal Type -- 3.1.3 Transformative Potential of "Added Value" Businesses -- 3.2 More Sustainable Food Production -- 3.2.1 Business Cases -- 3.2.2 Transformative Business Model Ideal Type -- 3.2.3 Transformative Potential of "More Sustainable" Production Businesses -- 4 Discussion -- References --

The Networked Business Model for Systems Change: Integrating a Systems Perspective in Business Model Development for Sustainability Transitions -- 1 Introduction -- 2 Importance of a Systems Perspective in Business Model Design for Sustainability Transitions -- 2.1 Business Models for Sustainability -- 2.2 Transition Studies, System-Building and Business Models. 2.3 'Networked Business Models' Essential for System Change -- 3 Interconnected Business Models Needed at Company and Network Level -- 3.1 Networked Business Model for System-Building -- 3.2 Interrelatedness of Firm-Centred Business Models and the Networked Business Model -- 4 Illustrative Cases -- 5 Conclusion -- References --

Sustainable Value Creation for Advancing Sustainability Transition: An Approach to Integrate Company- and System-Level Sustainability -- 1 Introduction -- 2 Theoretical Foundation -- 2.1 Integrating Company- and System-Level Sustainability Through Sustainable Business Model Research -- 2.2 Key Concepts in Sustainable Business Model Research -- 2.3 Sustainable Value Creation for Advancing Sustainability Transition -- 3 Research Design -- 4 Adopting a Sustainable Value Creation Approach -- 4.1 Place Your Business into a System-Level Context and Define System Boundaries -- 4.2 Define What System-Level Sustainability Means to Your Business and Set a Final Goal -- 4.3 Create a Common Understanding of a Sustainable Future Through the Concrete Targets and Build Your Own Value Creation Processes Sustainably -- 4.4 Focus on Sustainable Value Outcomes and Pay Attention to the Negative Consequences of Value Creation -- 4.5 Commit to System-Level Sustainability Targets and Identify the Value Capturing Potential to Enhancing Virtuous Circles -- 5 Discussion and Conclusion -- 5.1 Managerial and Policy Implications -- 5.2 Limitations and Future Research -- References --

Building BoP Business Models for Sustainable Poverty Alleviation: System Tips and System Traps -- 1 Introduction -- 2 Business Models at the Bottom of the Pyramid -- 3 Applying Multi-Level Perspective at the Bottom of the Pyramid -- 3.1 Potential Roles of Business Models in Sustainability Transitions -- 3.2 Methods and Data. 4 System Traps as Sources of Sustainability Misalignment for BoP Business Models -- 5 Potential Roles for Different Types of BoP Business Models in Sustainability Transition -- 5.1 Delivering Models -- 5.2 Sourcing Models -- 5.3 Reorganising Models -- 5.3.1 Designing BoP Business Models to Avoid System Traps and Align to Sustainability Transitions -- 5.4 Business Model Design Principles to Address Specific System Traps -- 5.5 Universal Sustainability Enablers for BoP Business Models -- 6 Conclusion -- References --

Part II: Beyond Business-as-Usual: Alternative Value Creation Logics Driving Sustainability Transitions -- The Business Model of Enough: Value Creation for Sufficiency-Oriented Businesses -- 1 Introduction -- 2 Sufficiency for Sustainability -- 3 Introducing Social Practice Theory -- 4 An Ideal-Type Business Model for Sufficiency -- 4.1 A Practice-Theoretical View on Business Models -- 4.2 A Practice-Theoretical Framework for Sufficiency-Oriented Business Models -- 5 Impacts of the Business Model of Enough -- 5.1 Communities of Sufficiency Practices -- 5.2 Practice-Based Institutional Change -- 5.3 Spillover Effects for Sustainability Transitions -- 6 Conclusion -- References -- Collaborative Business Models and Platforms in Shared

Mobility Transitions: The Case of Bikeshare Integration -- 1
Introduction -- 2 Methods -- 3 Results -- 3.1 Systematic Review
of CBM Literature -- 3.1.1 Group 1: Collaboration Refers to Practices
That Occur Between Organisations -- 3.1.2 Group 2: Collaboration
Refers to One Organisation's Key Activity or Sector -- 3.1.3 Group 3:
Collaboration Refers to a Kind of BM That Is Analytically Distinct
from the BMC -- 3.1.4 CBMs, Commons and the City -- 3.1.5 Balancing
Competition and Collaboration: CBMs and Platform Competition -- 3.2
MaaS Platforms: Competition, Collaboration and the Commons.
3.3 Case Studies -- 3.3.1 The Deelfietsdashboard (Rotterdam
and Other Cities, NL) -- 3.3.2 Antwerp Marketplace for Mobility
(Antwerp, BE) -- 3.3.3 Whim Helsinki (Helsinki, FI) -- 4 Discussion -- 5
Conclusions and Recommendations for Future Research -- Addendum:
Interviews -- Interview Protocols -- List of Interviews, Presentations or
Meetings, and Grey Literature Sources Per Case -- References --
Upscaling Sustainable Niches: How a User Perspective of Organizational
Value Logics Can Help Translate Between Niche and System -- 1
Upscaling of Sustainable Niches: The Dilemma Faced by Sustainable
Entrepreneurs -- 2 Organizational Value Logics as Conceptual Link
Between Sustainable Niches and Regime Structures -- 2.1 From
Business Models to Organizational Value Logics -- 2.2 User
Perspective of Organizational Value Logics for a Better Understanding
of Upscaling -- 3 The Users' Perspective on the Organizational Value
Logic of Utopiastadt -- 3.1 The Case of Utopiastadt -- 3.2 Results:
Narratives Reflecting the Conflicting Logics Faced by Utopiastadt -- 4
Discussion and Further Research on Organizational Value Logics
in Sustainability Transitions -- References -- Part III: Being the Change:
Transformative and Transformed Business Models in Selected Industries
-- IoT-Driven Reuse Business Models: The Case of Salesianer Textile
Rental Services -- 1 Introduction -- 2 Literature Background -- 2.1
Circular Economy -- 2.2 The Performance Economy -- 2.3
Transitioning Towards a Service-Oriented CE -- 2.4 Smart Products
and the IoT as Enablers -- 3 Method -- 4 Case Study: Salesianer
Miettex -- 4.1 Case Overview -- 4.2 Smart Reuse of Fast-Cycling
Goods -- 4.3 Smart Maintenance and Repair -- 4.4 (Smart) Recycling
-- 4.5 Smart Feedback into Procurement (and Product Design) -- 4.6
Case Summary.
5 Discussion: The Role of Smart Rental Textiles in the Transition
to a Circular Economy -- 5.1 Making Reuse Business Models
Outperform Single Use -- 5.2 Digital Technologies as Enablers
of Circular Innovation -- References -- Business Models for Smart
Sustainability: A Critical Perspective on Smart Homes and Sustainability
Transitions -- 1 Introduction -- 2 Theoretical Foundations -- 3
Methodology -- 4 Company and Business Context -- 5 Sustainability
Value as Visibility -- 6 Home as Sacred -- 7 Networked
Responsibilities -- 8 Discussion and Conclusion -- References --
Business Models for Energy Efficiency Services: Four Archetypes Based
on User-Centeredness and Dynamic Capabilities -- 1 Introduction -- 2
Theoretical Framework -- 2.1 Service-Based Business Models
and Sustainability -- 2.2 Dynamic Capabilities for Service-Based
Business Models -- 3 Methodology -- 4 Results: Business Model
Archetypes in EES -- 4.1 BM1: Pushing Technology Harder -- 4.2
BM2: Reframing What You Propose -- 4.3 BM3: Pushing Something
Else-The Use Phase Model -- 4.4 BM4: Servicing Model -- 5
Discussion and Conclusions -- 5.1 The Road to Becoming More User
Centered and Service Oriented -- 5.2 Clues to Potential Success
Factors -- 5.3 Implications for Management, Policy and for Further
Research -- Appendix -- References -- Reverse Logistics Process

for Business Transitions: An Example from the Clothing Industry -- 1
Introduction -- 1.1 The Role of Sustainability Transitions -- 1.2 The
Role of Business and Industries for Sustainability Transitions -- 2 New
Business Models: Going Beyond the Traditional Scope of the Firms --
2.1 New Business Models for the Sustainability Transition -- 2.2 The
Use of a Life-Cycle Perspective -- 2.3 Going Beyond Boundaries
with Open Innovation Networks.
3 The Case: Going Beyond the Traditional Scope in the Clothing
Industry.
