Sommario/riassunto	L'ouvrage consiste à aborder les questions éthiques, juridiques et de gouvernance politique impliquées dans la prise en charge des patients atteints de la maladie d'Alzheimer. Cette politique multi niveaux (municipale, départementale, régionale, nationale et européenne) est un des champs d'action publique des plus innovants en matière de politique de santé et un espace d'expérimentation de nouveaux référentiels éthico politiques d'action et d'évaluation.
