

1. Record Nr.	UNINA9910508447703321
Titolo	Image and graphics technologies and applications : 16th Chinese conference on image and graphics technologies, IGTA 2021, Beijing, China, June 6-7, 2021, revised selected papers // edited by Yongtian Wang and Weitao Song
Pubbl/distr/stampa	Singapore : , : Springer, , [2021] ©2021
ISBN	981-16-7189-3
Descrizione fisica	1 online resource (283 pages)
Collana	Communications in Computer and Information Science ; ; v.1480
Disciplina	636.005
Soggetti	Semantics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Preface -- Organization -- Contents -- Image Processing and Enhancement Techniques -- Residual Multi-resolution Network for Hyperspectral Image Denoising -- 1 Introduction -- 2 Methodology -- 2.1 Network Architecture -- 2.2 Residual Multi-Resolution Block -- 3 Experimental Results and Analysis -- 3.1 Experimental Setup -- 3.2 Results and Analysis -- 4 Conclusion -- References -- Skin Reflectance Reconstruction Based on the Polynomial Regression Model -- 1 Introduction -- 2 Related Work -- 2.1 Human Skin Spectral -- 2.2 Polynomial Regression Model -- 3 Algorithms -- 3.1 The Xiao's Algorithm -- 3.2 The Proposed Algorithm -- 3.3 Regularization -- 4 Experiment Setup -- 4.1 Evaluation Metrics -- 4.2 Experiment Data -- 5 Result and Discussion -- 6 Conclusion -- References -- From Deep Image Decomposition to Single Depth Image Super-Resolution -- 1 Introduction -- 2 The Proposed Method -- 2.1 Depth Dual Decomposition Block -- 2.2 Depth Image Initialization Block -- 2.3 Depth Image Rebuilding Block -- 2.4 Loss Function -- 3 Experimental Results -- 3.1 Training Details -- 3.2 The Objective Quality Comparison of Different Methods -- 3.3 The Visual Quality Comparison of Different Methods -- 4 Conclusion -- References -- Classification of Solar Radio Spectrum Based on VGG16 Transfer Learning -- 1 Introduction -- 2 VGG16 and Transfer Learning -- 2.1 VGG16

Convolutional Neural Network Model -- 2.2 Transfer Learning -- 3
Spectrum Image Preprocessing and Classification Algorithm -- 3.1
Preprocessing of Solar Radio Spectrum Data -- 3.2 VGG16 Transfer
Learning Algorithm -- 4 Experimental Results and Analysis -- 5
Conclusion -- References -- A Channel Attention-Based Convolutional
Neural Network for Intra Chroma Prediction of H.266 -- 1 Introduction
-- 2 Proposed Method -- 2.1 Neighboring Block Information Extraction
Module.
2.2 Current Block Information Extraction Module -- 2.3 Feature Fusion
Module -- 3 Experiment Results -- 3.1 The Robustness Analysis
of Chroma Prediction Performance -- 3.2 Coding Performance -- 4
Conclusion -- References -- Biometric Identification Techniques --
A Novel Deep Residual Attention Network for Face Mosaic Removal -- 1
Introduction -- 2 The Proposed Method -- 2.1 Parallel Residual Block
-- 2.2 Channel Attention -- 2.3 Pixel Attention -- 3 Experimental
Results -- 3.1 Experimental Settings -- 3.2 Quantitative and Qualitative
Evaluation -- 4 Conclusion -- References -- Machine Vision and 3D
Reconstruction -- Pretrained Self-supervised Material Reflectance
Estimation Based on a Differentiable Image-Based Renderer -- 1
Introduction -- 2 Related Work -- 3 Self-supervised Architectures -- 4
Image-Based Differentiable Renderer -- 4.1 Normal Representation --
4.2 Ambient Light Representation -- 4.3 Material Representation -- 5
Synthetic Dataset -- 6 Loss Functions -- 7 Experiments -- 8
Conclusion -- References -- Image/Video Big Data Analysis and
Understanding -- Object-Aware Attention in Few-Shot Learning -- 1
Introduction -- 2 Related Work -- 2.1 Few-Shot Learning -- 2.2
Saliency Object Detection -- 3 Method -- 3.1 Preliminaries -- 3.2
Framework -- 3.3 Object-Aware Attention Module -- 4 Experiments --
4.1 Datasets -- 4.2 Baseline Models and Experiment Details -- 4.3
Experiment Result -- 5 Conclusion -- References -- Simultaneously
Predicting Video Object Segmentation and Optical Flow Without Motion
Annotations -- 1 Introduction -- 2 Methodology -- 2.1 Base Model --
2.2 Object Flow Synthesizing -- 3 Network Implementation and
Training -- 3.1 Offline Training -- 3.2 Online Training -- 4
Experimental Results -- 4.1 Dataset and Evaluation Metrics -- 4.2
Ablation Study on Video Object Segmentation -- 4.3 Segmentation
Results -- 4.4 Object Flow.
4.5 Runtime Analysis -- 5 Concluding Remarks -- References --
Recognition of Bending Deformed Pipe Sections in Geological Disaster
Area Based on an Ensemble Learning Model -- 1 Introduction -- 2
Feature Engineering -- 2.1 Typical Pipe Section -- 2.2 IMU Data Feature
Construction -- 3 Ensemble Learning -- 3.1 Support Vector Machine --
3.2 K-means Clustering -- 3.3 Ensemble Learning Based on Voting
Method -- 3.4 Analysis of Results -- 4 Conclusion -- References --
Memory Bank Clustering for Self-supervised Contrastive Learning -- 1
Introduction -- 2 Related Work -- 2.1 Self Supervised Contrastive
Learning -- 2.2 Memory Bank Based Method -- 3 Method -- 3.1
Contrastive Learning with Memory Bank Clustering -- 3.2 Training
with Dynamic Memory Bank -- 3.3 Contrastive Loss with Dynamic
Memory Bank -- 4 Experiment -- 4.1 Experiment Details -- 4.2
Experimental Results -- 5 Conclusion -- References -- Robust Visual
Question Answering Based on Counterfactual Samples and Relationship
Perception -- 1 Introduction -- 2 Related Work -- 2.1 Visual Question
Answering -- 2.2 Counterfactual Sample Synthesis Mechanism for VQA
-- 2.3 Relationship Perception in VQA -- 3 Method -- 3.1 Relationship
Perception Network -- 3.2 Counterfactual Sample Generation
Mechanism -- 3.3 Loss Functions -- 4 Experiment -- 4.1 Dataset --
4.2 Parameter Setting -- 4.3 Performance on the VQA-CP v2 Dataset --

4.4 Performance on the VQA V2 Dataset -- 4.5 Ablation Experiment of CSRP Model -- 5 Conclusion -- References -- Prototype Generation Based Shift Graph Convolutional Network for Semi-supervised Anomaly Detection -- 1 Introduction -- 2 Related Work -- 2.1 Video Anomaly Detection -- 2.2 Graph Convolutional Networks -- 2.3 Prototype Generation Module -- 3 Method -- 3.1 Architecture Overview -- 3.2 Feature Extraction Module -- 3.3 Prototype Generation Module -- 3.4 VAD Objective Functions.

4 Experiments -- 4.1 Experiments on ShanghaiTech -- 4.2 Ablation Study -- 5 Conclusion -- References -- Computer Graphics -- A New Image Super-Resolution Reconstruction Algorithm Based on Hybrid Diffusion Model -- 1 Introduction -- 2 Related Work -- 2.1 Characteristics of Fractional Differential Operators -- 2.2 Fractional Anisotropic Diffusion Model -- 3 Model Algorithm and Design -- 3.1 Proposal of Mixed Diffusion Model -- 3.2 Realization of Adaptive Diffusion Function -- 3.3 Numerical Calculation of the Algorithm -- 4 Experiment and Analysis -- 5 Conclusion -- References -- Research on Global Contrast Calculation Considering Color Differences -- 1 Introduction -- 2 Related Work -- 3 Method -- 3.1 Traditional Method of Global Contrast -- 3.2 Global Contrast Calculation Considering Color Differences -- 4 Experimental Results -- 5 Conclusion -- References -- Virtual Reality and Human-Computer Interaction -- Research on Key Technologies and Function Analysis of Live Interactive Classroom in AI+ Era -- 1 Introduction -- 2 Advantages and Disadvantages of Webcast Classroom -- 2.1 Advantages of Webcast Class -- 2.2 Disadvantages of Webcast Class -- 3 AI Plus Key Technology of Synchronous Live Broadcast in Class -- 3.1 Face Recognition Technology -- 3.2 Human Behavior and Expression Analysis -- 3.3 Natural Language Processing -- 3.4 Knowledge Graph and Expert Systems -- 4 The Main Functions of Open Education AI Live Class -- 4.1 Basic Framework of the Platform -- 4.2 Introduction of AI Live-Streaming Classroom Functions -- 5 Conclusion -- References -- Applications of Image and Graphics -- BrainSeg R-CNN for Brain Tumor Segmentation -- 1 Introduction -- 2 Method -- 2.1 Mask R-CNN -- 2.2 BrainSeg R-CNN -- 3 Experiments -- 3.1 Dataset and Settings -- 3.2 Compared Experiments Using Slices with Tumors -- 3.3 Compared Experiments Using Whole Brain Image. 4 Conclusion -- References -- A Real-Time Tracking Method for Satellite Video Based on Long-Term Tracking Framework -- 1 Introduction -- 2 Method Framework -- 2.1 Feature Extraction -- 2.2 Re-detection Mechanism -- 2.3 PCA Based Dimensionality Reduction -- 3 Experimental Results and Analysis -- 4 Conclusion -- References -- Fourier Series Fitting of Space Object Orbit Data -- 1 Introduction -- 2 Related Works -- 2.1 TLE Orbit Data -- 2.2 Orbit Elements -- 3 Data Fitting -- 3.1 Commonly Used Fitting Algorithms -- 3.2 Fourier Series Fitting -- 4 Experiment and Analysis -- 4.1 Classification Selection of Experimental Samples -- 4.2 Data Pre-processing -- 4.3 Evaluation Criteria of Fitting Results -- 4.4 Data Fitting -- 4.5 Predicting Results -- 5 Conclusion -- References -- Mapping Methods in Teleoperation of the Mars Rover -- 1 Introduction -- 2 Mars Rover Teleoperation Control Mode -- 3 Multi-scale Mapping Mode Based on Multi-source Data -- 3.1 Large Area Mapping Using Orbit Images Based on the Two-Stage Method -- 3.2 Landing Site Mapping Using Descent Sequence Images -- 3.3 3D Terrain Reconstruction Based on Image Fusion -- 3.4 Wide Baseline Mapping Using Multi-site Images -- 4 Conclusions -- References -- Other Research Works and Surveys Related to the Applications of Image and Graphics Technology -- A Regularized Limited-Angle CT Reconstruction Model Based on Sparse Multi-level Information Groups of the Images -- 1 Introduction -- 2 Analysis

of Group Sparsity Model -- 3 The Proposed Model -- 4 Algorithms -- 5
Numerical Experiments -- 6 Conclusions and Prospects -- References
-- Author Index.
