Sommario/riassunto	<p>PubMed is a free resource supporting the search and retrieval of biomedical and life sciences literature with the aim of improving health—both globally and personally. The PubMed database contains more than 37 million citations and abstracts of biomedical literature. It does not include full text journal articles; however, links to the full text are often present when available from other sources, such as the publisher's website or PubMed Central (PMC). Available to the public online since 1996, PubMed was developed and is maintained by the National Center for Biotechnology Information (NCBI), at the U.S. National Library of Medicine (NLM), located at the National Institutes of Health (NIH).</p> <p>MEDLINE is the primary component of PubMed.</p> <p>Time coverage: MEDLINE includes literature published from 1966 to present, and selected coverage of literature prior to that period.</p> <p>The subject scope of MEDLINE is biomedicine and health, broadly defined to encompass those areas of the life sciences, behavioral sciences, chemical sciences, and bioengineering needed by health professionals and others engaged in basic research, public health or related educational activities. Sommario/riassunto

The growth of the American high school that occurred in the twentieth century is among the most remarkable educational, social, and cultural phenomena of the twentieth century. The history of education, however, has often reduced the institution to its educational function alone, thus missing its significantly broader importance. As a corrective, this collection of essays serves four ends: as an introduction to the history of the high school; as a reevaluation of the power of narratives that privilege the perspective of school leaders and the curriculum; as a glimpse into the worlds created by students and their communities; and, most critically, as a means of sparking conversations about where we might look next for stories worth telling.
