Sommario/riassunto	This volume presents the most recent joint study of the research group Religion and Human Rights. This text is comprised of studies carried

out in twelve countries and divided into three parts according to their respective tree continents. Almost 10,000 youths have participated and all chapters deal with the question of whether and to what extent religious or worldview convictions hinder or favor the support of human rights. Studies are comparative on multiple levels because of the many religious groups and countries. The studies take into account personal, religious and socio-cultural differences, showing the ambivalent role of religion in the striving to make the world safer, more democratic, just, and compassionate thru human rights. This text appeals to students and researchers.

Sommario/riassunto	With a foreword by Noam Chomsky, this is the most up-to-date critical analysis of the problems faced by the Kurds in Turkey. Turkey has a long history of human rights abuses against its Kurdish population - a

population that stretches into millions. This human rights record is one of the main stumbling blocks in Turkey's efforts to join the EU. The Kurds are denied many basic rights, including the right to learn or broadcast in their own language. This book, written by a leading human rights defender, provides a comprehensive account of the key issues now facing the Kurds, and the prospects for Turkey joining the EU. Kerim Yildiz outlines the background to the current situation and explores a range of issues including civil, cultural and political rights, minority rights, internal displacement, and the international community's obligations regarding Turkey.
