

1. Record Nr.	UNINA9910508483303321
Titolo	Plant growth and stress physiology / / Dharmendra K. Gupta, Jose Manuel Palma, editors
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-78420-7
Descrizione fisica	1 online resource (284 pages)
Collana	Plant in Challenging Environments ; ; Volume 3
Disciplina	581.31
Soggetti	Growth (Plants) Plants - Effect of stress on Creixement (Plantes) Efecte de l'estrès sobre les plantes Fisiologia vegetal Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Contents -- Chapter 1: Plant Stress, Acclimation, and Adaptation: A Review -- 1.1 Introduction -- 1.2 Stresses in Plants -- 1.3 Plant Responses Against Multiple Stressors to Develop Tolerance -- 1.4 Acclimation and Adaptation Against Multiple Stressors Through Different Signalling Pathways -- 1.4.1 Redox Signalling -- 1.4.2 MAP Kinase Pathway -- 1.4.3 Role of Phytohormones and Growth Regulators in Stress Signalling Pathway -- 1.5 Tolerance to Heavy Metals -- 1.5.1 Synthesis of Metal Chelators -- 1.5.2 Secretion of Organic Acids in Root Exudates -- 1.6 Tolerance to Heat Stress -- 1.7 Tolerance to Salt Stress -- 1.8 Plant Immune Response Against Biotic Stress -- 1.9 Antioxidant Defense System -- 1.9.1 Enzymatic Antioxidative System -- 1.9.2 Non-enzymatic Antioxidative System -- 1.10 Conclusion and Future Prospects -- References -- Chapter 2: Insights into Role of Invisible Partners in Plant Growth and Development -- 2.1 Introduction -- 2.2 Novel Insights in Plant-Microbiome Research -- 2.3 Influence of Endophytes on Plant Primary Growth and Secondary Metabolism -- 2.4 Effect of Endophytes in Imparting Stress Tolerance to Host Plants --

2.5 Endophytes-Mediated Biotic Stress Response in Host Plants -- 2.6
Role of Endophytes in Improving Phytoremediation -- 2.7 Bio-Active
Secondary Metabolites Produced by Endophytes -- 2.8 Concluding
Remarks and Future Research Directions -- References -- Chapter 3:
High Temperature Sensing Mechanisms and Their Downstream
Pathways in Plants -- 3.1 Introduction -- 3.2 Sensing of Warm
Temperature -- 3.3 Pathways that Function Downstream to Warm
Temperature Sensing -- 3.4 Sensing of Heat Stress -- 3.5 Pathways
that Function Downstream to Heat Stress Sensing -- 3.5.1 HSFs- or
MBF1c-Dependent Pathways to Protect Plants Against Heat Stress --
3.5.2 Signals Involving Ca²⁺, ROS and NO.
3.5.3 Plant Hormone Signaling -- 3.5.4 Integration of Unfolded Protein
Responses in Cytosol and Endoplasmic Reticulum (ER) -- 3.6
Conclusions -- References -- Chapter 4: From Beneficial Bacteria
to Microbial Derived Elicitors: Biotechnological Applications to Improve
Fruit Quality -- 4.1 Introduction -- 4.2 Plant Fitness. Growth
and Mechanisms for Adaptation to Stress. Factors Limiting Growth --
4.3 The Multifactor Solution: PGPR -- 4.4 Case Study: Blackberry -- 4.5
Conclusions -- References -- Chapter 5: Come Hell or High Water:
Breeding the Profile of Eucalyptus Tolerance to Abiotic Stress Focusing
Water Deficit -- 5.1 Introduction -- 5.2 Data Mining Challenge:
The State of the Art of Research on Biomarkers for Water Deficit
Tolerance in Eucalyptus -- 5.3 Brief on Phenotypic Biomarkers
and Environmental Conditions -- 5.3.1 Anatomical -- 5.3.2
Morphological and Growth Measures -- 5.3.3 Nutritional -- 5.3.4
Physiological -- 5.4 Statistical Issues -- 5.4.1 Reliable Data
and Reproducible Results -- 5.4.2 Repeatability, Reliability
and Accuracy -- 5.4.3 Criteria for Selecting Biomarkers -- 5.4.4 Field,
Greenhouse and Molecular Sources of Information -- 5.4.5
Experimental Design -- 5.4.6 Statistical Tools -- 5.5 Eucalyptus
Interplay and Outcomes -- 5.5.1 Functional Homeostasis -- 5.6 Gaps
and Future Research Outlook -- 5.7 Conclusions -- References --
Chapter 6: Organic Fertilization of Fruit Trees as an Alternative
to Mineral Fertilizers: Effect on Plant Growth, Yield and Fruit Quality --
6.1 Introduction -- 6.2 Organic Amendment -- 6.2.1 Animal Manure --
6.2.2 Municipal Biosolids -- 6.2.3 Cover Crops -- 6.2.4 Agro-Industry
Wastes -- 6.2.5 Compost -- 6.3 Effect of Organic Matter on Plants --
6.3.1 Effect on Nutritional Status and Growth -- 6.3.2 Effect on Yield
and Fruit Quality -- 6.4 Biofertilizers -- 6.5 Conclusions -- References.
Chapter 7: Evaluation of Turbulence Stress on Submerged Macrophytes
Growing in Lowland Streams Using H₂O₂ as an Indicator -- 7.1
Introduction -- 7.2 Dominant Stressors in the Natural Water -- 7.3
Effect of Temperature on ROS and Antioxidant Activities -- 7.4 Effects
of Photosynthesis on the H₂O₂ and Antioxidant Activities -- 7.5 The
Indicator of the Fractions of Stresses Associated with the Turbulence
Stresses -- 7.6 Stress Patterns of the Changing Light Intensity -- 7.7
Effect of the Water Turbulence on the Structural Components
of the Macrophyte Tissues -- 7.8 Biomass -- 7.9 Conclusion --
References -- Chapter 8: Opportunities of Revegetation and Bioenergy
Production in Marginal Areas -- 8.1 Global Solid Waste Generation --
8.2 Nonhazardous Waste Treatment -- 8.3 Landfills Restoration.
Postclosure Use -- 8.4 Bioenergy as Strategy in Closed Landfill -- 8.5
Conclusion -- References -- Chapter 9: Biochar Behaviour
and the Influence of Soil Microbial Community -- 9.1 Introduction --
9.2 Soil-Biochar Interaction (Biochar Behaviour in Soil) -- 9.3 Biochar
Soil Microbiota Interaction -- 9.3.1 The Role of Feeding Types -- 9.3.2
Bacteria -- 9.3.3 Fungi -- 9.3.4 Other Microbiotas -- 9.3.5 Archaeal --
9.3.6 Nematodes -- 9.3.7 Actinomycetes -- 9.3.8 Enzyme Activities --

9.3.9 Factors Modulating Biochar-Microbiota Behaviour -- 9.3.10
Biochar Feedstock -- 9.3.11 Pyrolysis Temperature -- 9.3.12 Soil Type
-- 9.3.13 Biochar Application Rate -- 9.3.14 Particle Size -- 9.3.15
Residence Time (Aging) -- 9.3.16 Presence of Organic Compounds --
9.3.17 Land Use and Agricultural Management Practices -- 9.3.18
Implications for Soil Ecosystem -- 9.3.19 Waste Management -- 9.3.20
Immobilization and Sorption of Contaminants -- 9.3.21 Potential
Source of Nutrients -- 9.3.22 Biogeochemical Cycling -- 9.3.23 Soil
Biological Diversity and Activity -- 9.3.24 Food Quality.

9.4 Conclusions and Future Research -- References -- Chapter 10: New
Insights into the Functional Role of Nitric Oxide and Reactive Oxygen
Species in Plant Response to Biotic and Abiotic Stress Conditions --
10.1 Introduction -- 10.2 Nitric Oxide Signalling in Plant Response
to Stress Conditions -- 10.2.1 NO Signalling Under Biotic Stress --
10.3 NO Signalling under Abiotic Stress -- 10.4 Reactive Oxygen
Species and Oxidative Stress in Plants under Stress Conditions --
10.4.1 Modulation of ROS Levels during Biotic Stress -- 10.4.2
Modulation of ROS Levels during Abiotic Stress -- 10.5 New Insights
the Interaction Between NO and ROS in Plant Response to Stress
Conditions -- 10.6 Conclusions -- References -- Chapter 11: Selenium
Transport, Accumulation and Toxicity in Plants -- 11.1 Introduction --
11.2 Selenium Uptake and Transport -- 11.3 Selenate -- 11.4 Selenite
-- 11.5 Organic Selenium Compounds -- 11.6 Selenium Distribution,
Translocation, and Accumulation -- 11.7 Beneficial Effects of Selenium
for Plants -- 11.8 Selenium Toxicity in Plants -- 11.9 Toxicity
of Selenoproteins -- 11.10 ROS-Induced Selenium Toxicity -- 11.11
RNS-Induced Selenium Toxicity -- 11.12 Phytoremediation -- 11.13
Phytoextraction -- 11.14 Phytovolatilization -- 11.15 Conclusions
and Future Perspectives -- References -- Chapter 12: Selenium
in Algae: Bioaccumulation and Toxicity -- 12.1 Introduction -- 12.2 Se
Metabolism in Algae -- 12.2.1 Se Accumulation and Transformation --
12.2.2 Se Beneficial Role, Toxicity and Detoxification Mechanisms --
12.2.3 Algae as Se Bioindicators and Accumulators, and Their
Applications -- 12.3 Conclusions -- References.
