Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Pattern Languages of Programs (PLoP) conference is a venue for pattern authors to have their pattern languages reviewed by fellow authors. The purpose of PLoP is to promote the development of pattern languages, primarily about aspects of software: design and programming, testing, software architecture, user interface design, domain modelling, education, human relations, and software processes. Patterns and pattern languages for domains outside software are also welcome.

Sommario/riassunto

"With contributions from worldwide leaders in the field of bariatric surgery, Psychosocial Assessment and Treatment of Bariatric Surgery Patients provides an up-to-date source of information regarding psychosocial issues in the assessment and treatment of bariatric surgery patients. It is comprehensive in scope and includes background information about bariatric surgery procedures, assessment of candidates (both by clinical interview and the use of structured interviews and self-report), a review of psychosocial and eating problems that occur pre- and post-operatively, and a review of both nutritional issues and exercise issues for evaluators and treatment providers. Unique chapters include a chapter on psychopharmacological agents and a chapter on assessment of special issues in adolescents, who increasingly are the target of bariatric surgery procedures. By the end of the book, readers will know how to evaluate and prepare patients for surgery and how to treat them after"
