

1. Record Nr.	UNINA9910510428603321
Titolo	29th ACM SIGSPATIAL International Conference on Advances in Geographic Information Systems (ACM SIGSPATIAL 2021) : Tuesday November 2 - Friday November 5, 2021, Beijing, China // Xiaofeng Meng [and five others], editors
Pubbl/distr/stampa	New York : , : The Association for Computing Machinery, , 2021
Descrizione fisica	1 online resource (680 pages) : illustrations (some color)
Collana	ACM international conference proceedings series
Disciplina	910.285
Soggetti	Geographic information systems Geospatial data
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	These proceedings contain the papers from the 29th ACM SIGSPATIAL International Conference on Advances in Geographic Information Systems (ACM SIGSPATIAL 2021), held online November 2-5, 2021. The conference started as a series of workshops and symposia back in 1993 with the aim of promoting interdisciplinary discussions among researchers, developers, users, and practitioners and fostering research in all aspects of geographic information systems, especially in relation to novel systems based on geospatial data and knowledge. It continues to provide a forum for original research contributions covering all conceptual, design and implementation aspects of geospatial data ranging from applications, user interfaces and visualization, to data storage, query processing, indexing and data mining. The conference is the premier annual event of the ACM Special Interest Group on Spatial Information (ACM SIGSPATIAL).
