

1. Record Nr.	UNINA9910510453103321
Autore	Meng Weizhi
Titolo	ASSS '21 : proceedings of the 2021 International Symposium on Advanced Security on Software and Systems : June 7, 2021, Virtual Event, Hong Kong / / Weizhi Meng, Li Li
Pubbl/distr/stampa	New York, New York : , : Association for Computing Machinery, , 2021
Descrizione fisica	1 online resource (62 pages) : illustrations
Disciplina	005.8
Soggetti	Computer security
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>It is our great pleasure to welcome you to ACM ASSS 2021, the First International Symposium on Advanced Security on Software and Systems, in conjunction with ACM AsiaCCS 2021, which will be held virtually in Hong Kong China on June 7, 2021. In this year, our symposium attracted submissions from China, France, Germany, India, Japan and the United States. Each submission was reviewed by at least three Program Committee members based on the significance, novelty, technical quality and relevance in the field. The review process was double-blind. The acceptance rate is 22.2% with two papers were selected as full paper. In addition, three short papers were accepted. As the first edition of ASSS, we believe that this is a good start for its success in future.</p>
