	Autore	Lofstead Jay
	Titolo	Proceedings of the 4th International Workshop on Practical Reproducible Evaluation of Computer Systems / / Jay Lofstead, Carlos Maltzahn, Ivo Jimenez
	Pubbl/distr/stampa	New York, New York : , : Association for Computing Machinery, , 2021
	Descrizione fisica	1 online resource (14 pages) : illustrations
	Disciplina	004.24
	Soggetti	Computer systems - Evaluation
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Sommario/riassunto	The Workshop on Practical Reproducible Evaluation of Computer Systems (P-RECS) focuses heavily on practical, actionable aspects of reproducibility in broad areas of computational science and data exploration, with special emphasis on issues in which community collaboration can be essential for adopting novel methodologies, techniques and frameworks aimed at addressing some of the challenges we face today. The workshop brings together researchers and experts to share experiences and advance the state of the art in the reproducible evaluation of computer systems, featuring contributed papers and invited talks. This 4th edition of the workshop (P-RECS '21) took place as a half-day virtual event. Due to the COVID-19 pandemic, putting together P-RECS'21 took extra effort this year, as the organizer did their best to recreate the participatory atmosphere of the three previous editions. We would like to thank all authors who submitted to the workshop. The diverse submission and selection assure interesting discussions and most importantly out-of-the-box thinking and generation of new ideas during the workshop. We are grateful to the program committee who worked very hard in reviewing papers and providing feedback for authors.
