| 1. Record Nr. | UNISA990005935620203316 |
| Autore | BALENA, Giampiero |
| Titolo | Vol.1.: I princìpi [2.ed.] / Giampiero Balena |
| Pubbl/distr/stampa | Bari : Cacucci, 2013 |
| Edizione | [2. ed.] |
| Descrizione fisica | XVI, 159 p. ; 24 cm |
| Disciplina | 347.4505 |
| Soggetti | Diritto processuale civile |
| Collocazione | XXVII.1.B. 361 1a |
| Lingua di pubblicazione | Italiano |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |

| 2. Record Nr. | UNINA9910510567203321 |
| Autore | Harsini Sara |
| Titolo | Nuclear Medicine and Immunology |
| Pubbl/distr/stampa | Cham : , : Springer International Publishing AG, , 2022
©2022 |
| ISBN | 9783030812614
9783030812607 |
| Descrizione fisica | 1 online resource (532 pages) |
| Altri autori (Persone) | AlaviAbass
RezaeiNima |
| Soggetti | Electronic books. |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Nota di contenuto | Intro -- Preface -- Acknowledgment -- Contents -- 1: Introduction on Nuclear Medicine and Immunology -- 1.1 The Immune System: |

Building Blocks and Mechanisms -- 1.1.1 Inflammation -- 1.1.2 Infection -- 1.1.3 Immuno-Oncology -- 1.2 Nuclear Medicine in Immune-Mediated Conditions -- 1.2.1 Infectious Diseases -- 1.2.2 Inflammatory Diseases -- 1.2.3 Radioimmunoimaging -- 1.3 Radioimmunotherapy -- 1.4 Evaluation of Tumor Response to Immunotherapy -- 1.5 Concluding Remarks -- References -- 2: Nuclear Imaging of Endogenous Markers of Lymphocyte Response -- 2.1 Introduction -- 2.2 Strategies for Imaging Endogenous Immune Biomarkers -- 2.2.1 Cell Surface Immune Markers -- 2.2.2 Intracellular Metabolic Pathways -- 2.2.3 Secreted Biomarkers -- 2.2.4 Strengths and Limitations Compared to Ex Vivo Labeling Approaches -- 2.3 Imaging T Cell Responses -- 2.3.1 Overview of T Cell Biology -- 2.3.2 T Cell Activation and Proliferation -- 2.3.2.1 Targeting Cell Surface Lineage Markers -- 2.3.2.2 Targeting Cell Surface Activation Markers -- 2.3.2.3 Targeting Intracellular Metabolic Pathways -- 2.3.3 T Cell Cytotoxicity -- 2.3.4 T Cell Inhibition and Control -- 2.4 Imaging B Cell Responses -- 2.4.1 Overview of B Cell Biology -- 2.4.1.1 Targeting Cell Surface Lineage Markers -- 2.5 Imaging Natural Killer (NK) Cell Responses -- 2.5.1 Overview of NK Cell Biology -- 2.5.1.1 Emergence of NK Cell Therapies -- 2.5.1.2 Candidate Endogenous Targets for NK Cell Imaging -- 2.6 Priorities and Future Considerations -- 2.7 Conclusion -- References -- 3: Radioimaging of Activated T Cells in Preclinical and Clinical Cancer Investigations -- 3.1 Introduction -- 3.2 Direct Labeling -- 3.3 Indirect Labeling -- 3.3.1 Reporter Genes -- 3.3.1.1 Thymidine Kinase Reporter Gene Tracers -- FIAU -- FHBG -- FEAU -- 3.3.1.2 T Cell Receptor Targeting. 3.3.1.3 hNIS Reporter Gene Tracer: [99mTc]TcO₄ -- 3.3.1.4 hNET Reporter Gene Tracer: MIBG -- 3.3.2 Deoxyribonucleotide Salvage Pathway Reporters -- 3.3.2.1 FAC -- 3.3.2.2 CFA -- 3.3.2.3 AraG -- 3.3.2.4 FMAU -- 3.3.2.5 FLT -- 3.3.3 Interleukins -- 3.3.4 Antibodies, Antibody Fragments, and Peptides -- 3.3.4.1 PD-1 -- 3.3.4.2 Anti-CD152 (CTLA-4) mAb -- 3.3.4.3 Anti-CD3 mAb -- 3.3.4.4 Anti-CD8 mAb -- 3.3.4.5 OX40 (CD134) -- 3.3.4.6 T Cell Receptor Targeting -- 3.3.4.7 Granzyme B -- 3.4 Conclusions -- References -- 4: Gallium Imaging of Infection and Inflammation -- 4.1 Introduction -- 4.2 Infection Imaging -- 4.3 Preclinical Studies in Infection -- 4.3.1 Chlamydia -- 4.3.2 Aspergillosis -- 4.3.3 Intra-abdominal Infections -- 4.4 Clinical Studies Using Infection Imaging -- 4.4.1 Osteomyelitis -- 4.4.2 Tuberculosis -- 4.4.3 Fever of Unknown Origin (FUO) -- 4.5 Inflammation Imaging -- 4.5.1 Nonspecific Inflammation Processes and Tracers -- 4.5.2 Specific Inflammatory Processes and Tracers -- 4.5.3 Tumor-Related Inflammation -- 4.6 PET Imaging of Inflammation -- 4.6.1 Central Nervous System -- 4.6.1.1 Preclinical -- 4.6.1.2 Clinical -- 4.6.2 Cardiovascular System -- 4.6.2.1 Atherosclerosis -- 4.6.2.2 Vulnerable Plaque -- 4.6.2.3 Post-myocardial Infarct Inflammation -- 4.6.2.4 Post-medical Device Implantation -- 4.6.2.5 Platelet and Thrombus Imaging -- Clinical -- 4.6.3 Respiratory System -- 4.6.4 Gastrointestinal Tract (GIT) -- 4.6.5 Inflammatory Joint Diseases -- 4.7 Summary and Future Considerations -- References -- 5: 111Indium-Labeled Leukocyte Imaging of Infection and Inflammation -- 5.1 Introduction -- 5.2 Inflammation -- 5.3 Radiolabeled Leukocytes -- 5.4 Normal Distribution and Kinetics of Radiolabeled Leukocytes -- 5.5 Pathological Distribution of Radiolabeled Leukocytes. 5.6 Clinical Applications -- 5.6.1 Clinical Guidelines -- 5.6.2 Fever of Unknown Origin (FUO) -- 5.6.3 Infective Endocarditis and Cardiac Electronic Devices -- 5.6.4 Vascular Graft Infection -- 5.6.5 Joint Prosthesis Infection -- 5.6.6 Diabetic Infections -- 5.6.7 Appendicitis

-- 5.6.8 Inflammatory Bowel Disease -- 5.6.9 Rheumatoid Arthritis --
5.7 Improvements in Leukocyte Scans -- 5.8 Conclusion --
References -- 6: [99mTc]Tc-HMPAO-Labeled Leukocyte Imaging
of Infection and Inflammation -- 6.1 Introduction -- 6.2 Leukocyte
Labeling Procedure -- 6.3 Biodistribution -- 6.4 Comparison
of 99mTc-WBC with 111In-WBC Scintigraphy -- 6.5 Dosimetry -- 6.6
Infection/Inflammation Evaluation-General Considerations -- 6.7
Inflammatory Bowel Disease -- 6.8 Musculoskeletal Infections -- 6.8.1
Peripheral Bone Infections -- 6.8.2 Neuropathic Joint Versus
Osteomyelitis -- 6.8.2.1 Combined WBC-Marrow Imaging -- 6.8.3
Postoperative/Prosthesis Infections -- 6.8.4 Spondylodiscitis -- 6.8.5
Chronic Infection/CMRO -- 6.8.5.1 SPECT and SPECT/CT -- 6.9 Fever
of Unknown Origin (FUO) -- 6.10 Cardiovascular Infections -- 6.10.1
Infectious Endocarditis (IE) -- 6.10.2 Mycotic Aneurysm -- 6.10.3
Vascular Graft Infection -- 6.10.4 Cardiovascular Implantable
Electronic Device (CIED) Infection -- 6.11 Pulmonary Infections --
6.11.1 Interpretation -- 6.12 Imaging pitfalls -- 6.12.1 Pitfalls
in Lung Imaging -- 6.12.2 Pitfalls Elsewhere in the Body -- 6.13 Other
Considerations -- 6.13.1 Tumors -- 6.13.2 Eosinophilic Syndromes
-- 6.13.3 Graft Versus Host Disease (GVHD) -- 6.13.4 Treatment
Monitoring -- 6.14 Pediatric Population -- 6.15 Future Directions --
References -- 7: 2-[18F]FDG PET Imaging of Infection
and Inflammation -- 7.1 Introduction -- 7.2 Mechanism of 2-[18F]
FDG Uptake in Malignant and Inflammatory Cells -- 7.3 Tissue
Infection.
7.4 Osteomyelitis -- 7.5 Cardiac Device Infection and Inflammatory
Diseases of the Heart -- 7.6 Vascular Graft Infection (Vascular
Prosthesis Infection) -- 7.7 Joint Prosthesis Infection -- 7.8
Tuberculosis (TB) -- 7.9 Sarcoidosis -- 7.10 Autoimmune Diseases --
7.10.1 Vasculitis -- 7.10.2 Inflammatory Bowel Diseases (IBD) --
7.10.3 IgG4-Related Disease -- 7.10.4 Rheumatoid Arthritis (RA) --
7.10.5 Other Autoimmune Diseases -- 7.11 Immune Deficiency (HIV-
Related Disease) -- 7.12 Conclusion -- References -- 8: 2-[18F]FDG
PET/CT in Fever of Unknown Origin -- 8.1 Introduction -- 8.2
Morphological and Molecular Imaging -- 8.3 2-[18F]FDG PET/CT
in FUO -- 8.4 Timing of 2-[18F]FDG PET/CT in FUO -- 8.5 Cost-
Effectiveness -- 8.6 Conclusion -- References -- 9: Tumor-Targeting
Agents -- 9.1 Introduction -- 9.2 Ligand Targeted Therapy -- 9.3
Antibody -- 9.3.1 Monoclonal Antibody -- 9.3.1.1 Immune Response
to Monoclonal Antibodies -- 9.3.1.2 Antibody Engineering -- 9.3.2
Antibody Fragments Variations -- 9.3.2.1 Characteristics of Antibody
Fragments -- Conjugated Antibody -- 9.3.3 Pretargeting -- 9.4 Small
Molecule Inhibitors Targeting Kinases -- 9.4.1 Structure and Mode
of Action of Small Molecule Inhibitors -- 9.4.2 Limitations of Small
Molecule Inhibitors as Targeted Cancer Therapy -- 9.5 Development
of Newer Drugs -- 9.5.1 Selective High-Affinity Ligand (SHAL) -- 9.5.2
Phage Display Technique for New Targeting Ligands -- 9.6 Selective
Small Molecule Targeted Radionuclide Imaging/Therapy -- 9.6.1
Tumor Receptor Targeting with Radiolabeled Peptides -- 9.6.2
Radioligand Targeted Diagnosis and Therapeutics in Prostate Cancer --
9.6.2.1 Monoclonal Antibodies -- 9.6.2.2 Small Molecule Inhibitors --
9.7 The Use of Nano-Drug Carrier -- 9.8 Aptamers -- 9.9 Conclusion
-- References -- 10: Tumor Architecture and Targeted Delivery.
10.1 Introduction -- 10.2 Organization of the Solid Tumor -- 10.2.1
Parenchymal Component -- 10.2.2 Stromal Component -- 10.2.3
Cancer-Associated Fibroblasts (CAF) -- 10.3 Cancer Metastasis --
10.4 Angiogenesis -- 10.5 Tumor Vascular Architecture -- 10.6
Transport Across the Microvascular Wall -- 10.7 Transport Across

the Stroma -- 10.8 Transport Across the Parenchyma -- 10.9 Strategies to Reduce the Barriers for the Macromolecules to Reach Their Target -- 10.10 Drug Delivery in Cancer -- 10.10.1 Drug Delivery Targeting Tumor Vasculature -- 10.10.1.1 Passive Targeting -- 10.10.1.2 Active Targeting -- 10.10.2 Increase in Blood Circulation Time and Reduced Immunogenicity -- 10.10.3 Drug Release Based on the Tumor Microenvironment -- 10.10.4 Prodrug Mechanism -- 10.10.5 Drug Delivery by Modulation of Tumor Vasculature -- 10.11 Conclusion -- References -- 11: Radionuclide Therapy and Immunomodulation -- 11.1 Introduction -- 11.2 The Role of the Immune System in Radiotherapy -- 11.2.1 External Beam Radiation Therapy and Abscopal Responses -- 11.2.2 Immunomodulation by EBRT Can Contribute to Therapeutic Efficacy -- 11.2.3 Molecular Understanding of Immunomodulation by EBRT -- 11.2.3.1 Increasing Sensitivity of Tumor Cells to Cytotoxic Immune Cells -- 11.2.3.2 Lymphocyte Activation -- 11.2.3.3 Lymphocyte Recruitment -- 11.2.3.4 Innate Immune Activation -- 11.2.3.5 Concurrent Immuno suppressive Effects -- 11.3 Targeted Radionuclide Therapy and the Immune System -- 11.3.1 Understanding the Mechanisms of Immune Activation by TRT (Preclinical Evidence) -- 11.3.2 Clinical Evidence for an Immune Response -- 11.4 Conclusion -- References -- 12: Translational Development and Testing of Theranostics in Combination with Immunotherapies -- 12.1 Introduction -- 12.2 Rationale for Combining Radiation and Immunotherapy. 12.2.1 Immunomodulatory Effects of Radiation on Tumor Cells.
