Sommario/riassunto

This book constitutes the refereed proceedings of the 24rd Brazilian
 Symposium on Formal Methods, SBMF 2021, which was held in
 December 2021. Due to COVID 19-pandemic it took place virtually. The
 8 regular papers presented in this book were carefully reviewed and
 selected from 15 submissions. The papers detail the development,
 dissemination, and use of formal methods for the construction of high-
 quality computational systems, aiming to promote opportunities for
 researchers and practitioners with an interest in formal methods to
 discuss the recent advances in this area.
