

1. Record Nr.	UNINA9910510574503321
Autore	Hicks Richard M
Titolo	Implementing Always on VPN : Modern Mobility with Microsoft Windows 10 and Windows Server 2022
Pubbl/distr/stampa	Berkeley, CA : , : Apress L. P., , 2022 ©2022
ISBN	9781484277416 9781484277409
Descrizione fisica	1 online resource (373 pages)
Soggetti	Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Table of Contents -- About the Author -- About the Technical Reviewer -- Acknowledgments -- Introduction -- Chapter 1: Always On VPN Overview -- VPN -- DirectAccess -- Demise of DirectAccess -- DirectAccess Replacement -- Always On VPN -- Always On VPN Infrastructure -- Routing and Remote Access Service -- Network Policy Server -- Infrastructure Independent -- Modern Management -- Cloud Integration -- Summary -- Chapter 2: Plan for Always On VPN -- VPN Server -- Windows Server -- Domain Join -- Server Core -- Network Interfaces -- Network Placement -- IPv6 -- Non-Microsoft VPN Devices -- IKEv2 -- Windows Store Client -- Authentication Server -- Windows Server -- PKI -- VPN Protocols -- IKEv2 -- SSTP -- L2TP -- PPTP -- Certificates -- SSTP -- IKEv2 -- NPS -- User Authentication -- Device Authentication -- TPM -- VPN Client IP Addressing -- DHCP -- Static Pool -- Address Range -- IPv4 Subnet -- IPv6 Prefix -- Split vs. Force Tunneling -- Split Tunnel -- Force Tunnel -- Firewall Configuration -- IKEv2 -- SSTP -- NAT Configuration -- Client Provisioning -- Microsoft Endpoint Manager -- PowerShell -- MECM -- Co-management -- Summary -- Chapter 3: Prepare the Infrastructure -- Security Groups -- Certificates -- Certificate Templates -- VPN Server -- NPS Server -- User Authentication -- Device Authentication -- Kerberos Authentication -- Issue Certificate Templates -- Issuing CA Servers -- Certificate Autoenrollment -- Autoenrollment GPO -- Summary --

Chapter 4: Configure Windows Server for Always On VPN -- Network Policy Server -- Preparation -- Install NPS -- Configure NPS -- RADIUS Client -- Network Policy -- Routing and Remote Access Service Server -- Preparation -- Network Configuration -- Single NIC -- Dual NIC -- External Interface -- Internal Interface -- Static Routes -- Certificates -- IKEv2 IPsec Certificate.

Server GUI Domain-Joined -- Server GUI Non-Domain Joined -- Export CA Certificates -- Import CA Certificates -- Generate CSR -- Request Certificate -- Server Core Domain-Joined -- Create INF File -- Create CSR -- Server Core Non-Domain Joined -- SSTP Certificate -- Install RRAS -- Install RSAT -- Windows Server -- Windows 10 -- Configure RSAT -- Configure RRAS -- Optimize RRAS -- IKEv2 Settings -- IPsec Parameters -- IKEv2 Fragmentation -- IKEv2 Root Certificate -- IKEv2 CRL Check -- TLS Configuration -- Summary -- Chapter 5: Provision Always On VPN Clients -- Validation Testing -- Verify Certificates -- Test Profile -- VPN Settings -- Authentication Settings -- Network Settings -- Routing -- IPsec Policy -- Test Connection -- SSTP -- IKEv2 -- Device Authentication -- Profile Deployment -- Microsoft Endpoint Manager -- Profile Configuration -- User Tunnel -- Device Tunnel -- Additional Configuration -- Custom XML -- XML Configuration -- Endpoint Manager -- PowerShell Script -- User Tunnel -- Device Tunnel -- SCCM -- Group Policy -- Group Policy Object -- Policy Settings -- Summary -- Chapter 6: Advanced Configuration -- Name Resolution Policy Table -- Configure NRPT -- Proxy Server -- Global Explicit Proxy -- Global Proxy Autoconfiguration -- Namespace Proxy -- Caveat -- Traffic Filtering -- Direction -- Application Filtering -- Desktop Application Filter -- Windows Store Application Filter -- SYSTEM Application Filter -- LockDown VPN -- LockDown Limitations -- Configure LockDown VPN -- Deleting LockDown VPN -- Summary -- Chapter 7: Cloud Deployments -- Azure VPN Gateway -- Advantages -- Disadvantages -- Requirements -- Gateway SKUs -- Site-to-Site Compatibility -- Azure VPN Gateway Configuration -- User Tunnel -- NPS Configuration -- Gateway Configuration -- Client Configuration -- Device Tunnel -- Root Certificate -- Gateway Configuration.

Client Configuration -- IKEv2 Cryptography -- Update Azure VPN IPsec Policy -- Update Client Policy -- Azure Virtual WAN -- Advantages -- Disadvantages -- Requirements -- Azure Virtual WAN Configuration -- Virtual WAN Hub -- Certificate Authentication -- RADIUS Authentication -- Point-to-Site Connection -- VNet Connection -- Client Configuration -- Windows Server RRAS -- Supportability -- Azure RRAS Configuration -- Public IP Address -- Inbound Traffic -- Client IP Subnet -- IP Forwarding -- Routing -- Third-Party VPN in Azure -- Summary -- Chapter 8: Deploy Certificates with Intune -- Deployment Options -- PKCS -- SCEP -- PKCS Certificates -- CA Permissions -- Certificate Template -- Install Certificate Connector for Intune -- PKCS Intune Configuration -- Export CA Certificates -- Deploy CA Certificates -- PKCS User Certificate -- PKCS Device Certificate -- SCEP Certificates -- Service Account -- CA Permissions -- Certificate Template -- Install NDES -- Configure NDES -- Publish NDES -- NDES TLS Certificate -- Install Intune Certificate Connector -- SCEP User Certificate -- SCEP Device Certificate -- Summary -- Chapter 9: Azure MFA Integration -- Azure MFA -- Is MFA Necessary? -- Risk Mitigation -- Certificate Authentication -- Additional Considerations -- Recommendation -- Azure MFA with NPS -- Requirements -- Install NPS Extension -- Update RRAS Authentication -- Certificate Management -- Troubleshooting Script -- Azure Conditional Access -- Requirements -- Configure Azure Conditional Access -- VPN Root

Certificate -- Publish Certificate -- Verify Certificates -- NPS
Configuration -- Update NPS Policy -- Conditional Access Policy --
Create Policy -- Client Configuration -- Endpoint Manager UI -- EAP
Configuration -- Custom XML -- Third-Party MFA -- Summary --
Chapter 10: High Availability -- VPN High Availability -- Prerequisites
-- Windows NLB.
Limitations -- Configure NLB -- Create NLB Cluster -- Add Cluster
Nodes -- Server Core -- External Load Balancer -- External Load
Balancer Configuration -- NPS High Availability -- Prerequisites --
Update Client Configuration -- Update VPN Configuration -- NPS Load
Balancing -- DNS Alias -- External Load Balancer -- Certificate
Configuration -- Geographic Load Balancing -- Azure Traffic Manager
-- Azure Traffic Manager and IKEv2 -- Azure Traffic Manager Profile --
Validation Testing -- DNS Alias -- Summary -- Chapter 11: Monitor
and Report -- RRAS Management Console -- Adding Servers -- Firewall
Requirements -- System Health -- User Activity -- Remote Access
Management Console -- Overview -- System Health -- User Activity --
Customize Headings -- Reporting -- PowerShell -- System Health --
User Activity -- Log Files -- Disconnecting Sessions -- Management
Consoles -- PowerShell -- Permanent Disconnects -- User Connections
-- Device Connections -- Summary -- Chapter 12: Troubleshooting --
Common Error Codes -- 809 -- Common Causes -- Testing -- Port
Probe -- Network Trace -- 812 -- Group Membership --
Authentication Type -- NPS Communication -- Azure Conditional
Access -- Event Logs -- Other Causes -- 13801 -- Testing -- 13806
-- Missing Client Certificate -- Missing Server Certificate -- 13868 --
VPN Server -- VPN Client -- Registry Setting -- NPS Configuration --
853 -- Missing Certificate -- 858 -- 864 -- Certificate Assignment --
Root Certificate -- 798 -- Permissions -- TPM -- Other Known Issues
-- Clients Prompted for Authentication -- RRAS Service Won't Start --
Load Balancing and NAT -- SSTP Connect/Disconnect -- Custom
Cryptography Settings Ignored -- Summary -- Index.
