1. Record Nr.   UNINA9910510602503321

   Titolo   ECOOP 2012 -- Object-Oriented Programming : 26th European
                      Conference, Beijing, China, June 11-16, 2012, Proceedings / / edited
                      by James Noble

   Pubbl/distr/stampa Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer,
                      , 2012

   ISBN   3-642-31057-5

   Edizione   [1st ed. 2012.]

   Descrizione fisica 1 online resource (XIV, 766 p. 101 illus.)

   Collana   Programming and Software Engineering ; ; 7313

   Disciplina   005.11

   Soggetti   Computer programming
                      Software engineering
                      Programming languages (Electronic computers)
                      Computer logic
                      Mathematical logic
                      Computer communication systems
                      Programming Techniques
                      Software Engineering
                      Programming Languages, Compilers, Interpreters
                      Logics and Meanings of Programs
                      Mathematical Logic and Formal Languages
                      Computer Communication Networks

   Lingua di pubblicazione Inglese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Note generali   Bibliographic Level Mode of Issuance: Monograph

   Nota di bibliografia Includes bibliographical references and index.

   Sommario/riassunto This book constitutes the refereed proceedings of the 26th European
                      Conference on Object-Oriented Programming, ECOOP 2012, held in
                      Beijing, China, in June 2012. The 27 revised full papers presented
                      together with two keynote lectures were carefully reviewed and selected
                      from a total of 140 submissions. The papers are organized in topical
                      sections on extensibility, language evaluation, ownership and
                      initialisation, language features, special-purpose analyses, javascript,
                      hardcore theory, modularity, updates and interference, general-
