ISBN	94-024-1606-4
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (384 pages)
Disciplina	616.3
Soggetti	Hepatology Infectious diseases Cancer - Surgery Infectious Diseases Surgical Oncology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction to Acute Exacerbation of Chronic Hepatitis B -- Research Technology and Principles of Clinical Study -- Virology -- Genetics -- Immunology.
Sommario/riassunto	This book assembles recent achievements in both basic research and clinical management in the field of hepatology, virology and immunology. It provides up-to-date information for clinicians who can apply the relevant knowledge to their daily clinical practice and for researchers who are interested in clinically orientated studies. The updated and detailed technology, state-of-the-art treatment strategies provided in this book serve as references for clinicians and resident physicians in the daily management of ACLF. The rationality and strategies for basic research as well as patient management in this book can also be a valuable reference for other fatal and end stage liver diseases than HBV induced ACLF. This volume 1 has 6 chapters and focuses on the definition, research technology, virology, genetics, and immunology.
