Sommario/riassunto

In *The Representation of External Threats* , Eberhard Crailsheim and María Dolores Elizalde present a collection of articles that trace the phenomenon of external threats in a multitude of settings across Asia, America, and Europe. The scope ranges from military threats against the Byzantine rulers of the 7th century to the perception of cultural and economic threats in the late 19th century Atlantic, and includes conceptual threats to the construction of national histories. Focussing on the different ways in which such threats were socially constructed, the articles offer a variety of perspectives and interdisciplinary methods to understand the development and representations of external threats, concentrating on the effect of 'threat communication' for societies and political actors. Contributors are Anna Abalian, Vladimir Belous, Eberhard Crailsheim, María Dolores Elizalde, Rodrigo Escribano Roca, Simon C. Kemper, Irena Kozmanová, David Manzano Cosano, Federico Niglia, Derek Kane O'Leary, Alexandr Osipian, Pedro Ponte e Sousa, Theresia Raum, Jean-Noël Sanchez, Marie Schreier, Stephan Steiner, Srikanth Thaliyakkattil, Ionut Untea and Qiong Yu.

Sommario/riassunto	Stress and accent are central, organizing features of grammar, but their precise nature continues to be a source of mystery and wonder. These issues come to the forefront in acquisition, where the tension between the abstract mental representations and the concrete physical manifestations of stress and accent is deeply reflected. Understanding the nature of the representations of stress and accent patterns, and understanding how stress and accent patterns are learned, informs all aspects of linguistic theory and language acquisition. These two themes - representation and acquisition - form the organizational backbone of this book. Each is addressed along different dimensions of

stress and accent, including the position of an accent or stress within various prosodic domains and the acoustic dimensions along which the pronunciation of stress and accent may vary. The research presented in the book is multidisciplinary, encompassing theoretical linguistics, speech science, and computational and experimental research.
