Livello bibliografico	Monografia
Note generali	Based on author's thesis (doctoral - European University Institute, 2014).
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction : transnational securities transactions and legal pluralism -- States, law and dispute resolution -- Securities regulation theory and the importance of private enforcement -- The liability regime for securities disputes -- Building a transnational securities dispute resolution system -- Institutional aspects of dispute resolution -- Alternative models of dispute resolution systems -- Aggregate litigation design -- Aggregate litigation models -- Transnational aspects of dispute resolution.
Sommario/riassunto	This book explores the transnational legal infrastructure for dispute resolution in transnational securities transactions. It discusses the role of law and dispute resolution in securities transactions, the types of disputes arising from them, and the institutional and legal aspects of dispute resolution, both generally and regarding aggregate litigation. It illustrates different dispute resolution systems and aggregate litigation methods, and examines the legal issues of dispute resolution arising from transnational securities transactions. In addition, the book proposes two systems of dispute resolution for transnational securities transactions depending on the type of dispute: collective redress through arbitration and a network of alternative dispute resolution systems
