

1. Record Nr.	UNINA9910511408003321
Autore	Melcuk Igor A (Igor Aleksandrovic), <1932->
Titolo	Aspects of the theory of morphology // by Igor Melcuk ; edited by David Beck
Pubbl/distr/stampa	Berlin ; ; New York, : Mouton de Gruyter, c2006
ISBN	1-282-19491-7 9786612194917 3-11-019986-6
Descrizione fisica	1 online resource (632 p.)
Collana	Trends in linguistics. Studies and monographs ; ; 146
Altri autori (Persone)	BeckDavid <1963->
Disciplina	415/.9
Soggetti	Grammar, Comparative and general - Morphology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [569]-596) and indexes.
Nota di contenuto	Frontmatter -- Contents -- Introduction -- PART I. The Syntax-Morphology interface -- Chapter 1. Agreement, government, congruence -- PART II. Morphology proper -- Chapter 2. Case -- Chapter 3. Voice -- Chapter 4. Case, the basic verbal construction, and voice in Maasai -- Chapter 5. Morphological processes -- Chapter 6. Gender and noun class -- Chapter 7. Morph and morpheme -- Chapter 8. Suppletion -- Chapter 9. Zero sign in morphology -- Chapter 10. The structure of linguistic signs and the semantic-formal relations between them -- PART III. The Morphology-Phonology Interface -- Chapter 11. The phonemic status of Spanish semivowels -- Conclusion Results and perspectives -- Backmatter
Sommario/riassunto	The book is dedicated to linguistic morphology and it contains a sketch of a complete morphological theory, centered around a discussion of fundamental concepts such as morph vs. morpheme, inflectional category, voice, grammatical case, agreement vs. government, suppletion, relationships between linguistic signs, etc.: the hottest issues in modern linguistics! The book introduces rigorous and clear concepts necessary to describe morphological phenomena of natural languages. Among other things, it offers logical calculi of possible grammemes in a given category. The presentation is developed in a typological perspective, so that linguistic data from a large variety of languages are described and analyzed (about 100 typologically very

different languages). The main method is deductive: the concepts proposed in Aspects of the Theory of Morphology are based on a small set of indefinibilia and each concept is defined in terms of these indefinibilia and/or other concepts defined previously; as a result, logical calculi can be constructed (similar to Mendeleev's Periodical Table of Elements in chemistry). Then the concept is applied to the actual linguistic data to demonstrate its validity and advantages. Thus, Aspects of the Theory of Morphology combines metalinguistic endeavor (a system of concepts for morphology) with typological and descriptive orientation. It reaches out to all students of language, including the border fields and applications.
