Nota di contenuto	Preliminary Material -- Introduction -- Overview of the Research -- Donated People in Social and Economic Contexts -- Free Strata of the Agricultural Population -- Donated People and the Economy of the Pemyslid State -- Bohemian Society in a Central European Context -- Conclusion -- Appendix: Donated People in the Written Sources -- Bibliography -- Index.
Sommario/riassunto	Power and Exploitation in the Czech Lands in the 10th-12th Centuries: A Central European Perspective offers a unique analysis of the history

of early medieval Czech society. It draws new attention to the role of serfdom and slavery in the early period of the Pemyslid dynasty in the Czech lands, and the organization of land and property access and ownership. The provocative conclusions reached by the author in this study shed new light on the oldest period of Czech history. Petráek analyses these issues comparatively, also taking into account Poland and Hungary; this is an approach unique to this book.
