Disciplina	658.404
Soggetti	Project management - Standards Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Implementing Project Portfolio Management addresses the “how-tos” of portfolio management. A major contribution to a field still evolving, this guide is aligned to The Standard for Portfolio Management – Fourth Edition and provides guidance for implementation. The real value the authors provide in this guide are insights on how to apply the performance management domains covered in the standard that are in practice today by introducing tools and templates into their discussion. Expansive in range, the management topics addressed include life cycle, strategy, governance, complexity, capacity and capabilities, stakeholders, value, risk, and agile practices in portfolio management. Ultimately, successful portfolio management requires all management levels to support and communicate the value of portfolio management to the organization and stakeholders—from innovation and ideation to selecting the right projects. Far-reaching in its impact on portfolio management practitioners, thinkers, stakeholders, and the wider project management community, this guide envisions the continued transformation of portfolio management with the changing needs of

organizations and advances in technology. For that reason, the authors created an accompanying website ([www.implementppm.com](http://www.implementppm.com)), which provides a forum for continuing the conversation regarding the concepts and practices of portfolio management.

Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (pages 26-30).
Sommario/riassunto	"This essay offers a proposal for the missing constructs and language with which we can more precisely think about and examine the Army's Professional Military Ethic, starting with its macro context which is the profession's culture. We examine three major long-term influences on that culture and its core ethos, thus describing how they evolve over time. We contend that in the present era of persistent conflict, we are witnessing dynamic changes within these three influences. In order to analyze these changes, we introduce a more detailed framework which divides the Ethic into its legal and moral components, then divide each of these into their institutional and individual manifestations. Turning from description to analysis, we also examine to what extent, if any, recent doctrinal adaptations by the Army (FM 3-0, 3-24, and 6-22, etc.) indicate true evolution in the essential nature of the profession's Ethic. Then, we present what we believe to be the most significant ethical challenge facing the Army profession -- the moral development of Army leaders, moving them from 'values to virtues' in order that they, as Army professionals, can consistently achieve the high quality

of moral character necessary to apply effectively and, in a trustworthy manner, their renowned military-technical competencies."--P. x
