Sommario/riassunto

Youth, Religion, and Identity in a Globalizing Context: International Perspectives investigates the ways that young people navigate the intersections of religion and identity. As part of the Youth in a Globalizing World series, this book provides a broad discussion on the various social, cultural, and political forces affecting youth and their identities from an international comparative perspective. Contributors to this volume situate the experiences of young people in Canada, the United States, Germany, and Australia within a globalized context. This volume explores the different experiences of youth, the impact of community and processes of recognition, and the reality of ambivalence as agency.
