Sommario/riassunto	This third volume in the AOSpine Masters Series covers the most common operative techniques for treating degenerative cervical conditions. The book provides expert guidance to help clinicians make the right treatment decisions and provide the best care for their patients. Chapter topics range from Laminectomy and Fusion for Cervical Spondylotic Myelopathy to Complications on Anterior Surgery: VA Injury, Esophageal Perforation, and Dysphagia. The AOSpine Masters

Series, a copublication of Thieme and the AOSpine Foundation,
addresses current clinical issues whereby international masters of spine
share their expertise and recommendations on a particular topic. --
