

1. Record Nr.	UNINA9910511905903321
Titolo	Participatory archives : theory and practice // edited by Edward Benoit, III and Alexandra Eveleigh
Pubbl/distr/stampa	London : , : Facet Publishing, , [2019] ©2019
ISBN	1-78330-358-1
Descrizione fisica	1 online resource (xiii, 263 pages) : digital, PDF file(s)
Disciplina	302.23
Soggetti	Archives - Technological innovations Archives - Digitization Archival resources - Social aspects Mass media and culture Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 25 Oct 2019).
Sommario/riassunto	The rise of digitisation and social media over the past decade has fostered the rise of participatory and DIY digital culture. Likewise, the archival community leveraged these new technologies, aiming to engage users and expand access to collections. This book examines the creation and development of participatory archives, its impact on archival theory, and present case studies of its real world application. Participatory Archives: Theory and practice is divided into four sections with each focused on a particular aspect of participatory archives: social tagging and commenting; transcription; crowdfunding; and outreach & activist communities. Each section includes chapters summarizing the existing literature, a discussion of theoretical challenges and benefits, and a series of case studies. The case studies are written by a range of international practitioners and provide a wide range of examples in practice, whilst the remaining chapters are supplied by leading scholars from Australia, Canada, Denmark, the Netherlands, Norway, the United Kingdom, and the United States. This book will be useful for students on archival studies programs, scholarly

researchers in archival studies who could use the book to frame their own research projects, and practitioners who might be most interested in the case studies to see how participatory archives function in practice. The book may also be of interest to other library and information science students, and similar audiences within the broader cultural heritage institution fields of museums, libraries, and galleries.
