

1. Record Nr.	UNINA9910511986203321
Autore	Lenain Roland
Titolo	Agricultural Robotics : With 27 Agricultural Robot Information Sheets
Pubbl/distr/stampa	Versailles : , : Quae, , 2021 ©2021
ISBN	9782759233830 2759233839
Descrizione fisica	1 online resource (100 pages)
Collana	Hors Collection
Altri autori (Persone)	PeyracheJulie SavaryAlain SéveracGaëtan
Disciplina	629.892
Soggetti	Robotics Automatic control
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Table des matières -- Agricultural robotics: part of the new deal? -- Preface -- Introduction -- - Agricultural Robots Help Farmers Feed the World -- - Successful Robot Adoption Depends on Reliability, Security and Trust -- - Farming with No Tractor Driver, is it Possible? -- - Safe Positioning and Image Analysis -- - From Lab to Success Story: What Business Model? -- Conclusion -- Robot Manufacturers' Information Sheets -- FIRA 2020 - Thank you to our main partners.
Sommario/riassunto	The farming and agricultural robotics industries are inextricably linked. This connection is reinforced every year at the FIRA International Forum of Agricultural Robots, where, inevitably, there are new players and new problems, bigger goals and better solutions. This book is a journey into the state of the art of the industry in 2020, followed by 27 agricultural robot information sheets.
