Sommario/riassunto	In Place of a Show is a compelling account of Western theatre buildings in the 21st century: theatres stripped of their primary purpose, lying empty, preserved as museums, or demolished. Playfully combining first-person narratives, scholarly research and visual documents, Augusto Corrieri explores the material and imaginative potentials of these places, charting interconnections between humans, birds, vegetation, and the beguiling animations of inanimate things, such as walls, curtains and seats. Across four chapters we learn of the uncanny dismantling and reconstitution of a German Baroque auditorium during the Second World War; the phantasmal remains of a demolished music hall in London's East End; a Renaissance Italian theatre, fleetingly transformed into an aviary by the appearance of a swallow; and a lavish opera house emerging from the Amazon rainforest. In these pages we are invited to discover theatres as sites of anomalous encounters and surprising coincidences: places that might reveal the performative entanglement of human and nonhuman worlds.

Sommario/riassunto	Gas Chromatography involves the study of various vaporizable molecules in chemistry and the other related research fields. This analytical method has a number of features and advantages that make it an extremely valuable tool for the identification, quantification and structural elucidation of organic molecules. This book provides detailed gas chromatography information to applications of biochemicals, narcotics and essential oils. The details of the applications were briefly handled by the authors to increase their comprehensibility and feasibility. This guide should be certainly valuable to the novice, as well as to the experienced gas chromatography user who may not have the enough experience about the specific applications covered in this book. We believe this book will prove useful in most laboratories where modern gas chromatography is practiced.
