Sommario/riassunto	This is the first book length study of performance activism. While Performance Studies recognizes the universality of human performance in daily life, what is specifically under investigation here is performance as an activity intentionally entered into as a means of engaging social issues and conflicts, that is, as an ensemble activity by which we reconstruct/transform social reality. Performance Activism: Precursors and Contemporary Pioneers provides a global overview of the growing interface of performance with education, therapy, conflict resolution, civic engagement, community development and social justice activism. It combines an historical study of the processes by which, over the

course of the 20th Century, performance has been loosened from the institutional constraints of the theatre with a mosaic-like overview of the diverse work/play of contemporary performance activists around the world. Performance Activism will be of interest to theatre and cultural historians, performance practitioners and researchers, psychologists and sociologists, educators and youth workers, community organizers and political activists. Dan Friedman is the Artistic Director Emeritus of the Castillo Theatre in New York City, a lead organizer of the bi-annual Performing the World Conference, and is on the faculty of the East Side Institute. .
