

1. Record Nr.	UNINA9910512171303321
Autore	Kumar Vikram
Titolo	Advances in Engine Tribology
Pubbl/distr/stampa	Singapore : , : Springer Singapore Pte. Limited, , 2022 ©2022
ISBN	9789811683374 9789811683367
Descrizione fisica	1 online resource (261 pages)
Collana	Energy, Environment, and Sustainability Ser.
Altri autori (Persone)	AgarwalAvinash Kumar JenaAshutosh UpadhyayRam Krishna
Soggetti	Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Contents -- Editors and Contributors -- Part I General -- 1 Introduction to Advances in Engine Tribology -- References -- Part II Emerging Challenges with Modern Engines -- 2 Friction, Wear, and Lubrication Studies of Alcohol-Fuelled Engines -- 2.1 Introduction -- 2.2 Frictional Losses in IC Engines -- 2.3 Wear Characterization -- 2.3.1 Wear Measurement Methods -- 2.3.2 Wear- Metal Analysis of Lubricating Oil Samples -- 2.3.3 Soot in Lubricating Oil Samples -- 2.3.4 Wear Analysis of Various Engine Components -- 2.4 Different Lubrication Methods -- 2.4.1 Lubricating Oil Properties and Their Variations -- 2.4.2 Effect of Alcohol on the Lubricating Oil -- 2.5 Carbon Deposits on Engine Components -- 2.6 Summary -- References -- 3 Impact of Biodiesel Blended Fuels on Combustion Engines in Long Term -- 3.1 Introduction -- 3.2 Effects of Biodiesel Blended Fuels on Engine Parts -- 3.2.1 Cylinder Head and Liner -- 3.2.2 Piston Top, Skirt and Rings -- 3.2.3 Fuel Injector -- 3.2.4 Pump Components -- 3.2.5 Valves -- 3.3 Conclusions -- References -- 4 Automated SI Engine Wear Parts -- 4.1 Introduction -- 4.2 Tribological Components of SI Engine -- 4.2.1 Piston Assembly -- 4.2.2 Engine Bearings -- 4.2.3 Valve Train -- 4.2.4 Gearbox Wear -- 4.2.5 Tire Wear -- 4.3 Engine Condition Monitoring -- 4.4 Summary -- References --

5 Wear of Wheels and Axle in Locomotive and Measures Taken by Indian Railway -- 5.1 Introduction -- 5.1.1 Wheel and Axle Problem -- 5.1.2 Defect Observed on the Wheels -- 5.2 Wear of Wheels -- 5.3 Defect Observed on the Axles -- 5.3.1 The Problem Associated with Axles -- 5.4 Possible Solution Adopted by Other Country -- 5.5 Wheel and Axle Problem in Indian Railways -- 5.6 Stakeholders and Interests -- 5.7 Organizational Implications -- 5.8 Atma Nirbhar Scheme of Indian Railways -- 5.9 Summary and Conclusion -- References.

Part III Recent Advances in Engine Tribology -- 6 Boundary Lubrication Properties of Nanolubricants on the Steel Surface for Transportation Application -- 6.1 Introduction -- 6.2 Materials and Experiment -- 6.2.1 Pin-On-Disk Tribometer -- 6.2.2 Preparation of Grease -- 6.3 Results and Discussions -- 6.3.1 Nanoparticles in an Oil Suspension -- 6.3.2 Nanoparticle in Water Suspension -- 6.3.3 Grease Analysis Using FTIR -- 6.4 Conclusions -- References -- 7 Nanomaterials Lubrication for Transportation System -- 7.1 Introduction -- 7.1.1 Lubrication -- 7.1.2 Lubrication Classification -- 7.1.3 Preventing Low and Excessive Lubrication -- 7.2 Lubricants Reducing Friction and Wear -- 7.3 Types of Lubrication -- 7.3.1 Boundary Lubrication -- 7.3.2 Mixed Lubrication -- 7.3.3 Hydrodynamic Lubrication -- 7.3.4 Elastohydrodynamic Lubrication -- 7.4 Composition of Lubricants -- 7.5 The Impact of Lubricants on Climate Change and the Environment -- 7.6 Properties of Nano Particles-Based Lubrication in Oil Medium -- 7.6.1 Automotive Oils -- 7.6.2 Railroad Engine Oils -- 7.6.3 Marine Engine Oils -- 7.6.4 Industrial Oils -- 7.7 Base Oil -- 7.7.1 Categories of Base Oil -- 7.8 Viscosity -- 7.8.1 Viscosity Versus Temperature -- 7.8.2 10.2Multigrade Versus Monograde Oil -- 7.9 Grease -- 7.10 Graphene Based Lubrication -- 7.11 MoS₂ Based Lubrication -- 7.12 Boron Based Lubrication -- 7.13 Boric Acid Based Lubrication -- 7.14 Tungsten Disulfide Based Lubrication -- 7.15 Lubrication of Rail Track Components -- 7.15.1 Lubricating Elastic Rail Clip (ERC) CLIPS -- 7.15.2 Greasing and Sealing Linear Contact Area -- 7.15.3 Lubricating Switch Expansion Joints (SEJs) -- 7.15.4 Lubricating Point and Crossings -- 7.15.5 Lubricating Rail Joints -- 7.15.6 Certificate of Lubrication -- 7.16 Conclusions and Future Directions -- References.

8 The Effect of Friction Induced Noise, Vibration, Wear and Acoustical Behavior on Rough Surface: A Review on Industrial Perspective -- 8.1 Introduction -- 8.2 Concept of Physical Contact Surface -- 8.3 Friction Noise Due to Wear -- 8.3.1 Airborne Noise and Wear -- 8.3.2 Acoustic Emission and Friction -- 8.4 Modelling Techniques -- 8.4.1 Wear Models -- 8.4.2 Friction Models -- 8.4.3 Empirical Models -- 8.5 Conclusion -- References -- Part IV Novel Materials for Advanced Engine Design -- 9 Composite Materials and Its Advancements for a Cleaner Engine of Future -- 9.1 Introduction -- 9.1.1 Need for Composites -- 9.1.2 History and Background -- 9.1.3 What Are Composites? -- 9.1.4 Composites Against Metals -- 9.1.5 Limitations in Use of Composites -- 9.2 Classification of Composites -- 9.2.1 Metal Matrix Composites -- 9.2.2 Ceramic Matrix Composites -- 9.2.3 Polymer Matrix Composites -- 9.2.4 Carbon-Carbon Composites -- 9.3 Properties of Composites -- 9.3.1 Metal Matrix Composites -- 9.3.2 Ceramic Matrix Composites -- 9.3.3 Carbon-Carbon Composites -- 9.3.4 Polymer Matrix Composites -- 9.4 Application of Composites -- 9.4.1 Metal Matrix Composites -- 9.4.2 Ceramic Matrix Composites -- 9.4.3 Carbon-Carbon Composites -- 9.4.4 Polymer Matrix Composites -- 9.5 Conclusion and Future Prospectus -- 9.6 Summary -- References -- 10 Role of Composite Materials in Automotive Sector:

Potential Applications -- 10.1 Introduction -- 10.1.1
History/Background -- 10.1.2 Characteristics of Automotive Material
-- 10.1.3 Materials Used for Automotive Applications -- 10.2
Application of Composite Materials in Automotive Components --
10.2.1 Engine Parts -- 10.2.2 Braking System -- 10.2.3 Suspension
System -- 10.2.4 Interior Trims -- 10.2.5 Exterior Trims -- 10.3 Other
Automobile Applications -- 10.4 Conclusions -- References.
11 Modeling of a Closed Loop Hydrostatic Transmission System and Its
Control Designed for Automotive Applications -- 11.1 Introduction --
11.2 System Description -- 11.3 Experiment Description -- 11.3.1 The
Hydraulic System Modeling and Experimental Validation -- 11.4
Traditional Pid Control of the Closed Loop System -- 11.4.1 PID
Controller Based on the Artificial Neural Network -- 11.5 Multiple
Linear Regression (MLR) -- 11.5.1 Performance Evaluation
for the Models -- 11.6 Comparative Analysis of the Speed Response
of Hydraulic Motor -- References -- 12 Study of Tribo-Corrosion
in Materials -- 12.1 Introduction -- 12.2 Tribocorrosion in Materials --
12.2.1 Tribocorrosion in Alloys -- 12.2.2 Tribocorrosion in Ceramics
-- 12.2.3 Tribocorrosion in Polymers -- 12.3 Future Scope -- 12.4
Conclusions -- References.
