

1. Record Nr.	UNINA9910512173903321
Titolo	The Moso bamboo genome // edited by Jian Gao
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2022] ©2022
ISBN	9783030808365 9783030808358
Descrizione fisica	1 online resource (220 pages)
Collana	Compendium of Plant Genomes
Disciplina	584.922
Soggetti	Agriculture Biotechnology Bambú Genètica molecular vegetal Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Preface to the Series -- Preface -- Acknowledgements -- Contents -- Contributors -- Abbreviations -- 1 Economic Value and Research Significance of Moso Bamboo -- Abstract -- 1.1 Distribution of Moso Bamboo -- 1.1.1 Global Distribution of Moso Bamboo -- 1.1.2 Distribution in China -- 1.1.3 Quality of Moso Bamboo Forests -- 1.1.4 Biomass and Carbon Stock of Moso Bamboo Forests -- 1.1.5 Resource Distribution and Changes -- 1.2 Uses and Economic Value -- 1.2.1 Uses -- 1.2.1.1 Used as an Alternative to Timber -- 1.2.1.2 Used as Food -- 1.2.1.3 Medicinal Uses -- 1.2.1.4 Ornamental Uses -- 1.2.1.5 Used in Papermaking -- 1.2.1.6 Used as Fodder -- 1.2.1.7 Used for Soil Conservation and Wind Blocking -- 1.2.1.8 Other Uses -- 1.2.2 Economic Value -- 1.3 Status of Moso Bamboo Research -- 1.3.1 Ecological Management of Moso Bamboo Forests -- 1.3.1.1 Studies on Management Model of Moso Bamboo Forest -- 1.3.1.2 Management Model of Moso Bamboo Mixed Forests -- 1.3.2 Study on Moso Bamboo Materials Properties -- 1.3.2.1 Study on Moso bamboo's Properties -- 1.3.3 Processing and Utilization of Moso Bamboo Materials -- 1.3.3.1 Bamboo-Based Panels -- 1.3.3.2 Bamboo Charcoal -- 1.3.3.3 Bamboo

Vinegar -- 1.3.3.4 Bamboo Fibre -- 1.3.4 Moso Bamboo Genome --  
References -- 2 Intraspecific Variation of Moso Bamboo -- Abstract --  
2.1 Introduction -- 2.2 Intraspecific Variation of Moso Bamboo -- 2.2.1  
Phyllostachys edulis f. edulis -- 2.2.2 Phyllostachys edulis f. abbreviata  
-- 2.2.3 Phyllostachys edulis f. anjiensis -- 2.2.4 Phyllostachys edulis f.  
aureovariegata -- 2.2.5 Phyllostachys edulis f. bicolor -- 2.2.6  
Phyllostachys edulis f. curvculmis -- 2.2.7 Phyllostachys edulis f.  
epruinosa -- 2.2.8 Phyllostachys edulis f. exaurita -- 2.2.9  
Phyllostachys edulis f. gracilis -- 2.2.10 Phyllostachys edulis f.  
heterocycla -- 2.2.11 Phyllostachys edulis f. holochrysa.  
2.2.12 Phyllostachys edulis f. huamozhu -- 2.2.13 Phyllostachys edulis  
f. luteosulcata -- 2.2.14 Phyllostachys edulis f. mira -- 2.2.15  
Phyllostachys edulis f. nabeshimana -- 2.2.16 Phyllostachys edulis f.  
obliquinoda -- 2.2.17 Phyllostachys edulis f. obtusangula -- 2.2.18  
Phyllostachys edulis f. pachyloen -- 2.2.19 Phyllostachys edulis f.  
porphyrosticta -- 2.2.20 Phyllostachys edulis f. purpureoculmis --  
2.2.21 Phyllostachys edulis f. purpureosulcata -- 2.2.22 Phyllostachys  
edulis f. quadrangulata -- 2.2.23 Phyllostachys edulis f. tubaeformis --  
2.2.24 Phyllostachys edulis f. tumescens -- 2.2.25 Phyllostachys edulis  
f. ventricosa -- 2.2.26 Phyllostachys edulis f. venusta -- 2.2.27  
Phyllostachys edulis 'Anderson' -- 2.2.28 Phyllostachys edulis 'Bicanna'  
-- 2.2.29 Phyllostachys edulis 'Jinsilonglinzhu' -- 2.2.30 Phyllostachys  
edulis 'Moonbeam' -- 2.2.31 Phyllostachys Edulis 'Oboro' -- 2.2.32  
Phyllostachys edulis 'Okina' -- References -- 3 Biological Traits of  
Moso Bamboo -- Abstract -- 3.1 Introduction -- 3.2 Rhizome  
Characteristics of Moso Bamboo -- 3.3 Shoot Growth Characteristics --  
3.3.1 Daily Growth of Moso Bamboo Shoot -- 3.3.2 Dynamic  
Anatomical Variation in Shoot Tip Growth Stages -- 3.4 Culm Growth  
Characteristics -- 3.5 Characteristics of Leaves -- 3.6 Characteristics  
of Flowers -- 3.7 Characteristics of Moso Bamboo Seeds -- 3.8 Bamboo  
Maturation and Growth Characteristics of Bamboo Stands -- References  
-- 4 Moso Bamboo Genome -- Abstract -- 4.1 Introduction -- 4.2  
Moso Bamboo Genome Size -- 4.3 Moso Bamboo Draft Genome -- 4.4  
The Genome Database of Bamboos -- 4.5 The Draft Genome of Other  
Bamboos -- 4.6 The Genome Polyploidy of Woody Bamboos -- 4.7 The  
Genome Clue to the Unique Biological Traits of Bamboos -- References  
-- 5 Moso Bamboo Transposon -- Abstract -- 5.1 Introduction.  
5.2 Long Terminal Repeat Retroelements (LTR Retroelements) from  
Moso Bamboo -- 5.3 MITEs from Moso Bamboo -- 5.4 Transposable  
Mariner-Like Elements (MLE) in Moso Bamboo -- 5.5 Transposable  
Elements and Moso Bamboo Flowering -- 5.6 Transposable Elements  
and Moso Bamboo Variants -- References -- 6 Transcriptome of Moso  
Bamboo -- Abstract -- 6.1 Global Transcriptome Analysis in the  
Growth of Moso Bamboo Shoots -- 6.1.1 Introduction -- 6.1.2  
Overview of Gene Expression in Each Shoot Growth Stage -- 6.1.3  
Functional Analysis on DGEs -- 6.1.4 Importance of Cell Division and  
Elongation to Shoot Elongation -- 6.1.5 Spatio-Temporal Dynamic  
Changes in Moso Bamboo Shoots -- 6.1.6 Conclusion -- 6.2 Global  
Transcriptome Analysis in Moso Bamboo Flower Development -- 6.2.1  
Quality Control and Filtering of Sequence Data -- 6.2.2 Reads Mapped  
to the Reference Genome Dataset -- 6.2.3 Putative Moso Bamboo Floral  
Development Transcription Factors -- 6.2.4 Detection of Putative  
Genes Associated with Flowering Time Control and Flower Development  
-- 6.2.5 Change of Gene Expression Profile in Varying Flower  
Developmental Stages -- 6.2.6 Expression Level of Putative Genes  
During Flower Development -- 6.2.7 Gene Validation and Expression  
Analysis -- 6.2.8 Conclusions -- 6.3 Global Transcriptome Analysis in  
Germinating Moso Bamboo Seeds -- 6.3.1 Global Transcriptome

Analysis -- 6.3.2 Germination Respiration Pathway -- References -- 7  
Alternative Splicing and Alternative Polyadenylation in Moso Bamboo --  
Abstract -- 7.1 Introduction -- 7.1.1 AS and APA in Plant -- 7.1.2 The  
Tissue-Specific AS and APA Pattern in Moso Bamboo -- 7.2 The  
Database of AS and APA in Moso Bamboo -- 7.3 Methods for  
Identification of AS and APA -- 7.3.1 Experiment and Sequencing --  
7.3.2 Bioinformatics Analysis -- 7.4 The Potential Functions of AS and  
APA.  
7.4.1 Alteration in Protein Domain by AS and APA -- 7.4.2 Nonsense-  
Mediated mRNA Decay (NMD) Regulation by AS and APA -- 7.4.3  
Alteration of miRNA Target Sites by AS and APA -- 7.4.4 Diverse Back-  
Splicing Landscape: Insights into Circular RNAs in Moso Bamboo -- 7.5  
Future Prospects -- References -- 8 Characterizations and Functions of  
Transcription Factor Gene Families -- Abstract -- 8.1 Resistance Gene  
Candidates -- 8.1.1 MYB Transcription Factor -- 8.1.2 BHLH  
Transcription Factors -- 8.1.3 bZIP Transcription Factors -- 8.1.4 GRF  
Transcription Factor -- 8.1.5 HD-Zip Transcription Factors -- 8.1.6  
PHD Transcription Factors -- 8.1.7 SPL Transcription Factors -- 8.1.8  
TCP Transcription Factors -- 8.1.9 Trihelix Transcription Factors --  
8.1.10 WRKY Family of Transcription Factors (TFs) -- 8.2 Flowering and  
Stamen Development Gene Candidates -- 8.2.1 Dof Transcription  
Factor -- 8.2.2 MADS Transcription Factor -- 8.2.3 CONSTANS-Like  
Gene Family -- 8.3 Endogenous Hormones Regulation in Shoot Fast  
Growth -- 8.3.1 SAUR Family Members -- 8.3.2 WUSCHEL-Related  
Homeobox (WOX) Protein Family -- 8.4 Ageing -- 8.4.1 NAC  
Transcription Factor -- References -- 9 MicroRNAs of Moso Bamboo --  
Abstract -- 9.1 Introduction -- 9.2 miRNAs Could Regulate  
Reproductive Growth of Moso Bamboo -- 9.3 miRNAs Could Regulate  
Vegetative Growth of Moso Bamboo -- 9.4 Functions of Moso Bamboo  
miRNAs in Abiotic Stress Responses -- References -- 10 Mitochondrial  
Genome of Bambusicolous Fungus- *Shiraia bambusicola* -- Abstract --  
10.1 Introduction -- 10.2 Mitogenome Summary -- 10.2.1 General  
Description of Dothideomycetes -- 10.2.1.1 Fast Development of  
Mitogenomes -- 10.3 Definition of *S. bambusicola* and Its Distribution  
-- 10.3.1 Variational Definition of *S. bambusicola* -- 10.3.2 Expansive  
Distribution of *S. bambusicola* -- 10.4 Fascinating Properties of *S.*  
*bambusicola*.  
10.4.1 Exceptional Bambusicolous Fungus and Its Special Host --  
10.4.2 Amazing Function of Natural Products -- 10.5 Mitogenome  
Structure of *S. bambusicola* -- 10.5.1 Small Mitogenome Size -- 10.5.2  
Explicit Sequence Structure -- 10.6 Interesting Genes from  
Mitogenome -- 10.6.1 Special Gene Order -- 10.6.2 Introns and the  
ORFs in Introns -- 10.6.3 Unknown ORFs and Conserved ORFs Within  
Intergenic Regions -- 10.6.4 Additional Obvious Characteristics --  
10.7 Evolutionary Status of *S. bambusicola* -- 10.8 Conclusions and  
Future Prospects -- References -- 11 Breeding Status and Strategies of  
Moso Bamboo -- Abstract -- 11.1 Main Propagation Methods and  
Techniques of Moso Bamboo -- 11.1.1 Transplanting of Mother  
Bamboo -- 11.1.2 Seedling of Moso Bamboo -- 11.1.3 Propagation by  
Burying Rhizomes -- 11.2 Main Breeding Methods and Techniques of  
Moso Bamboo -- 11.2.1 Hybrid Breeding Technology -- 11.2.2  
Radiation Mutation Breeding -- 11.2.3 Molecular Marker Assisted  
Breeding -- 11.3 Molecular Breeding -- 11.3.1 Tissue Culture of  
Sympodial Bamboo Species -- 11.3.2 Moso Bamboo Tissue Culture --  
11.3.3 Genetic Transformation -- 11.4 Gene Editing -- 11.5 Prospect  
of Future of Moso Bamboo Breeding -- 11.5.1 Main Problems in Moso  
Bamboo Breeding -- 11.5.2 Proposal of Moso Bamboo Breeding --  
11.5.3 The Main Goal and Direction of Breeding Research --

## References.
