Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Vorwort -- Inhaltsverzeichnis -- I. Einführung -- II. Die Basilika in byzantinischer Zeit -- III. Zur Funktion der byzantinischen Basiliken -- IV. Zum statistischen Verhältnis zwischen Längs- und Zentralbauten: Ein Versuch -- V. Ergebnis -- VI. Katalog -- Literaturverzeichnis -- Abbildungsnachweise -- Ortsindex -- Tafelteil
Sommario/riassunto	In Byzantium, the central structure is considered archetypical. This study shows that this assumption is only partly true. It presents the basilicas of the 7th to 15th centuries, addressing questions of typology, appointments, function, and the relationship to longitudinal and central constructions. It shows that the Byzantines were more flexible in their approach to these construction types than previously assumed, a conclusion supported by theological evidence.
