   Nota di contenuto Basics and basic concepts: How to work with these materials -- Video
                      1: Rumored knife control in school -- Video 2: Sea rescue -- Video 3:
                      Production for television and YouTube -- Adolescents and the topic of
                      flight in the media.

   Sommario/riassunto Adolescents want media that report in an understandable way and
                      show backgrounds and possible solutions. This book shows how the
                      concept of constructive journalism helps with this and how it can be
                      used in journalism training. This springer essential is a translation of
                      the original German 1st edition essentials, Journalistische Praxis:
                      Konstruktiver Journalismus by Gabriele Hooffacker, published by
                      Springer Fachmedien Wiesbaden GmbH, part of Springer Nature in
                      2020. The translation was done with the help of artificial intelligence
                      (machine translation by the service DeepL.com). A subsequent human
                      revision was done primarily in terms of content, so that the book will
                      read stylistically differently from a conventional translation. Springer
                      Nature works continuously to further the development of tools for the

production of books and on the related technologies to support the authors. The contents Using constructive journalism in crisis reporting · Producing media for adolescents · Using scenarios and video material for journalism education The target groups Journalists in studies and training, in editorial offices and in public relations · Teachers at universities, academies and journalism schools · The author Gabriele Hooffacker (*1959), Dr. phil., is a Professor teaching at the Faculty of Computer Science and Media at Leipzig University of Applied Sciences. She publishes the textbook series "Journalistic Practice" (Journalistische Praxis) at Springer VS. This book is a translation of an original German edition. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation.
