

| | |
|-------------------------|---|
| 1. Record Nr. | UNINA9910513576303321 |
| Autore | Huynh Dat Vu Khoa |
| Titolo | Proceedings of the 2nd Vietnam Symposium on Advances in Offshore Engineering : Sustainable Energy and Marine Planning |
| Pubbl/distr/stampa | Singapore : , : Springer Singapore Pte. Limited, , 2021 ©2022 |
| ISBN | 9789811677359 9789811677342 |
| Descrizione fisica | 1 online resource (559 pages) |
| Collana | Lecture Notes in Civil Engineering Ser. ; ; v.208 |
| Altri autori (Persone) | TangAnh Minh DoanDinh Hong WatsonPhil |
| Soggetti | Electronic books. |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Nota di contenuto | Intro -- Preface -- Organisation -- Organising Committee -- Chairmen -- International Members -- Local Members -- International Scientific Committee -- Coordinators -- Members -- Invited Reviewers -- Organisers -- Patronages -- Under the Auspices of -- Contents -- Keynote Lectures -- Data-Driven Ground Models: The Road to Fully-Integrated Site Characterization and Design -- 1 Introduction -- 2 Data Integration Aka Ground Models: Trilogy of Geology, Geophysics and Geotechnics -- 2.1 Ground Models - Definition and Semantics -- 2.2 Generic Workflow -- 3 Some Examples of Data-Driven Ground Models -- 3.1 synCPT -- 3.2 Co-kriging -- 3.3 Random Forest -- 4 Room for Improvements and Novel Developments -- 4.1 Data Quality, Density, and Quality -- 4.2 Added Value - Multi-sensor Core Logging -- 4.3 Added Value - UHR 3D Seismic Surveying -- 4.4 Blending Seismic Inversion with Machine Learning -- 4.5 Shear Wave Data: Tying the Knot -- 5 Summary -- References -- Experimental Observations on a Suction Bucket Foundation Under Vertical Pullout Loading -- 1 Introduction -- 2 Previous Studies on Pullout Capacity -- 3 Pullout Capacity According to Drainage Condition -- 3.1 Model Preparation and Testing -- 3.2 Results and Discussions -- 4 Conclusion -- |

References -- Phu Cuong Soc Trang Offshore Wind Farm Development
 Some Lessons Learnt -- 1 Offshore Wind Resource in Vietnam -- 2
 Features of Near Shore Windfarms Built to Date in the Mekong Delta
 Provinces -- 2.1 Ground Conditions -- 2.2 Weather Conditions
 for Installation -- 2.3 Wind Turbine Foundation Solutions -- 2.4
 Operation and Maintenance Solutions -- 3 Development of the Phu
 Cuong Soc Trang Offshore Wind Farm -- 3.1 Project Background -- 3.2
 Geotechnical Investigation -- 3.3 Metocean Surveys -- 3.4 Wind
 Measurement -- 3.5 Wind Turbine Foundation Design -- 3.6
 Engagement with Fishing Industry.
 3.7 Operation and Maintenance -- 3.8 Policy Support for Offshore FIT
 in Vietnam -- 3.9 Conclusions -- References -- Planning, Policy
 and Integration for Sustainable Development of Offshore Wind Energy
 in Vietnam 2022-2030 -- 1 Introduction -- 2 Vietnam Wind Resource
 is Excellent -- 3 Towards 5 GW of Wind Power Operational at the End
 of 2021 -- 4 Cost of Wind Power is Rapidly Falling, but FIT is Uncertain
 -- 5 Scenarios for Wind Power in Vietnam -- 6 Variability and Flexibility
 Needs -- 7 Infrastructure Requirements -- 8 Conclusion and Policy
 Implications -- References -- Site Characterization and Ground
 Modelling -- A Calculation Model for Borehole Collapse Volume
 in Deviated Openhole in Formation with Weak Plane -- 1 Introduction
 -- 2 Borehole Stresses -- 3 Elliptical Wellbore for Collapse Volume
 Calculation -- 4 Volume of Borehole Collapse -- 5 Results
 and Discussion -- References -- A Practical Application Using
 Industrial Waste for Enhancing the Mechanical Properties of Expansive
 Soil -- 1 Introduction -- 2 Materials and Experimental Programs -- 2.1
 Materials -- 2.2 Experimental Programs -- 3 Test Results
 and Discussion -- 3.1 Ultimate Shear Strength of Bagasse Fibre
 Reinforced Soil -- 3.2 Effects of Bagasse Fibre and Lime on Swelling
 Potential -- 3.3 Effects of Bagasse Fibre and Lime on Swelling Pressure
 -- 3.4 Effects of Bagasse Fibre and Lime on the Compression
 Characteristics -- 4 Conclusion -- References -- Dynamic Properties
 of a Calcareous Sand in UAE -- 1 Introduction -- 2 Laboratory Testing
 -- 3 Test Results and Discussions -- 3.1 Shear Strength -- 3.2 Small
 Strain Stiffness -- 3.3 Damping Ratio -- 3.4 Cyclic Resistance Ratio --
 4 Summary -- References -- Estimation of Damping Factors for a Better
 Assessment of Offshore Driven Piles Capacity -- 1 Presentation
 of the Studied Cases -- 2 Problem Statement.
 3 Impact of Damping Variations on Capacity Assessment at End of Drive
 -- 4 Impact of Damping Variations on Long-Term Capacity Estimation
 -- 5 Expected Damping Factor from the Literature -- 6 Expected
 Damping Factors from Local Experience -- 7 Conclusions
 and Recommendations -- References -- Finite Element Model of Wave
 Loading on a Soil Seabed Part I: Multi-layered Anisotropic Gassy Soil
 Conditions -- 1 Introduction -- 2 Governing Differential Equations
 for Multi-layer and Anisotropic Poro-Elastic Soil Conditions -- 3
 Harmonic Approximation of Governing Equations -- 4 Galerkin Finite
 Element Formulation -- 5 Incorporation into a Finite Element Model --
 6 Example of Wave Loading on a Two-Layered Soil Seabed -- 7
 Conclusions -- References -- Finite Element Model of Wave Loading
 on a Soil Seabed Part II: Heterogeneous Gassy Soil Conditions -- 1
 Introduction -- 2 Governing Differential Equations for Heterogeneous
 and Anisotropic Poro-Elastic Soil Conditions -- 3 Harmonic
 Approximation of Governing Equations -- 4 Galerkin Finite Element
 Formulation -- 5 Incorporation into a Finite Element Model -- 6
 Example Simulation of Wave Loading on a Buried Pipeline -- 7
 Conclusions -- References -- Geotechnical Characteristics of Seabed
 Deposits at Su Tu Trang Site, Cuu Long Basin, Offshore Vietnam -- 1

Introduction -- 2 Field Test Program -- 2.1 Site Location -- 2.2 In-Situ and Laboratory Tests -- 3 Soil Characterization -- 3.1 Soil Profile -- 3.2 Overconsolidation Ratio (OCR) -- 3.3 Undrained Shear Strength (su) -- 4 Conclusions -- References -- Investigation of Long-Term Settlement of Flexible Steel Oil Storage Tanks on Calcareous Sand in UAE -- 1 Introduction -- 2 General Tank Foundation and Ground Condition -- 3 Assessment in Situ Soil Density and Stiffness -- 4 Settlement Evaluation Using Laboratory Tests.

4.1 Measurement of Creep for Calcareous Sand Using Triaxial Test -- 4.2 Assessment of Cyclic Foundation Settlement -- 5 Concluding Remarks and Recommendations -- References -- Investigation of the Long-Term Cyclic Behaviour of Monopile Foundation by Impact and Vibratory Installation -- 1 Introduction -- 2 Numerical Calculation Concept -- 3 Soil Conditions After the Installation Process -- 4 Simulation of the Cyclic Loading -- 4.1 Numerical Model and Load Program -- 4.2 Material and Parameters for the Constitutive Models -- 4.3 Validation of the Numerical Results -- 5 Parameter Study -- 6 Conclusions -- References -- Jack up Spudcan Penetration Prediction for Murmanskaya Platform at X-Block, Nam Con Son Basin, Offshore Vietnam -- 1 Introduction -- 2 Theoretical Background -- 3 Results and Discussion -- 3.1 Geomorphology Seabed Hazard -- 3.2 Soil Conditions at Jack up Rig Location -- 3.3 Footing Penetration Prediction -- 4 Conclusions -- References -- Marine Operability Prediction Using Phase-Resolved Wave-Fields -- 1 Introduction -- 2 Concept and Methodology -- 2.1 Concept -- 2.2 Methodology -- 3 Simulation -- 4 Conclusion -- References -- Neural Network Modeling of Shear Wave Velocity of Macau Soils Using SPT and CPT Data -- 1 Introduction -- 2 Back Propagation (BP) Neural Network -- 3 Case Study -- 4 Analysis Results -- 4.1 The Model with SPT and Vs -- 4.2 The Model Between CPT and Vs -- 4.3 The Model Combining SPT, CPT, and Vs -- 5 Conclusion -- References -- Practical Considerations for Advanced Laboratory Tests to Assist Pile Design for Offshore Wind Projects in Vietnam -- 1 Introduction -- 2 ALT Strategy for WTG Piled/Monopile Foundations -- 2.1 Main Considerations for the Design of Piled/Monopile Foundation -- 2.2 ALTs for the Design of WTG Piled/Monopile Foundation -- 2.3 ALT Strategy for WTG Piled/Monopile Foundation.

3 Establishing Backbone Stiffness Curve from a Combination of Various ALT Techniques -- 4 Considerations to Cyclic Tests (ALT-3 Group) -- 5 Summary -- References -- Rock Physics Diagnostic (RPD) as a Value-Added Tool in Site Investigation of the Subsea Characteristics for an Offshore Wind Farm Site in Ca Mau, Vietnam -- 1 Introduction -- 2 Rock Physics Diagnostic (RPD) Method -- 3 Results and Discussion -- 4 Concluding Remarks -- References -- Undrained Shear Strength Assessments for Clay of the Offshore Wind Power Projects in Vietnam -- 1 Introduction -- 2 Soil Classification and Physical Properties of Clayey Soil -- 2.1 Project Site Overview -- 2.2 Physical Properties of Clayey Soil in Binh Dai -- 3 Mechanical Properties of Clayey Soil in Binh Dai -- 3.1 Sample Quality Evaluation -- 3.2 Undrained Shear Strength from Laboratory Test -- 3.3 Relation Between Normalised Undrained Shear Strength and IL -- 3.4 CPTU Interpretation -- 4 Conclusion -- References -- Design of Offshore Foundations and Structures -- Assessment of the Remaining Safety of Pipelines with Corrosion Defects -- 1 Introduction -- 2 Assessment Methods -- 3 FE Modeling Cases -- 4 Results and Discussions -- 4.1 Failure Pressure -- 4.2 Maximum Von Mises Stress -- 5 Conclusions -- References -- Cantilever Secant Pile Constructed in Sand: Numerical Comparative Study and Design Aids -- 1 Introduction -- 2 Methods

Employed -- 2.1 Parametric Study -- 2.2 Methods and Tools -- 3
Presentation and Analysis of Results -- 3.1 Effective Penetration Depth
and Design Hints -- 3.2 Rational Empirical Equations -- 4 Conclusions
-- References -- Communication and Control for Remotely Operated
Underwater Vehicles -- 1 Introduction -- 2 Hull Form of the Remotely
Operated Underwater Vehicles -- 3 Propulsive and Steering System --
3.1 Propulsive -- 3.2 Steering System -- 4 Communication
and Control.
4.1 ROV and Float Communication.
