abstract interpretation -- Two applications of an incremental analysis
engine for (constraint) logic programs -- PAN — The Prolog analyzer.

Sommario/riassunto

This book constitutes the refereed proceedings of the Third
International Static Analysis Symposium, SAS '96, held in Aachen,
Germany, in September 1996 in conjunction with ALP and PLILP. The
volume presents 22 highly-quality revised full papers selected from a
total of 79 submissions; also included are three system descriptions
and invited contributions by Alex Aiken (abstract only), Flemming
Nielson, and Bernhard Steffen. Among the topics addressed are
program analysis, incremental analysis, abstract interpretation, partial
evaluation, logic programming, functional programming, and constraint
programming.
