	Sommario/riassunto	In this analysis of racism in late nineteenth-century France, anti-Semitism is studied in its social context as an indicator and symptom of social change. The author provides a more general analysis of anti-Semitic ideology in France, and the text concludes with a study of the Jewish response to this challenge. The volume focuses on antisemitism in France at the time of the Dreyfus Affair. This upsurge of antisemitism occurred in a country which had a very small Jewish community, by Central and East European standards, and the 'autonomous' aspect of antisemitism, its general social function as an ideology, is thus more evident.
