Sommario/riassunto	This volume of the Neglected Tropical Diseases (NTD) series covers the most prevalent NTDs in Europe and Central Asia. This book discusses in detail the pathology, diagnostics and control approaches of the most important neglected pathogens occurring in these geographical regions. Each chapter focuses on one specific disease or group of

related diseases, and provides the reader with in-depth insights into the topic. This volume addresses researchers in Microbiology and Biomedicine as well as clinicians and public health officials working in affected regions.
