Sommario/riassunto	In Chosen Places. Constructing New Jerusalems in Slavia Orthodoxa , Jelena Erdeljan focuses on the Old Testament topic of the divinely-chosen status of Jerusalem and translatio Hierosolymi, including the history, process and media of formulating and disseminating this idea and its spatial-visual matrix in Christian visual culture. Firstly the study presents the case of Constantinople, the capital of the Byzantine Empire, as New Jerusalem, and secondly, in relation to Constantinople, discussion focuses on the cases of the capitals of Slavia Orthodoxa in the later Middle Ages: Turnovo, Belgrade and Moscow. The idea of

Jerusalem corresponds with the idea of a mystical center, the center of the historical Christian world, which travels and follows the path of eschatological realisation.
