

1. Record Nr.	UNINA9910522915103321
Autore	Al-Ahmed Amir
Titolo	The effects of dust and heat on photovoltaic modules : impacts and solutions // Amir Al-Ahmed [and three others], editors
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2022] ©2022
ISBN	3-030-84635-0
Descrizione fisica	1 online resource (318 pages)
Collana	Green Energy and Technology
Disciplina	621.381542
Soggetti	Photovoltaic cells
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Acknowledgements -- Contents -- Dust -- Dust Deposition on Photovoltaic Modules: Its Effects on Performance -- 1 Introduction -- 2 Fundamentals of Photovoltaic Module -- 2.1 Components of a Photovoltaic Module -- 2.2 Classification of Photovoltaic Modules -- 3 Factors Affecting the Performance of Photovoltaic Modules -- 4 Sources, Transportation and Deposition of Dust -- 4.1 Sources and Characteristics of Dust -- 4.2 Dust Particles Transportation -- 4.3 Factors Governing Dust Particles Deposition on PV Module Surfaces -- 5 Effects of Dust on the Performance of PV Modules -- 5.1 Effect of Dust on the PV Module Surface Light Transmittance -- 5.2 Effect of Dust on PV Module Surface Temperature -- 5.3 Effect of Dust on Short-Circuit Current -- 5.4 Effect of Dust on Open-Circuit Voltage -- 5.5 Effect of Dust on Maximum Power Output -- 5.6 Effect of Dust on I-V Characteristics -- 5.7 Effect of Dust on Fill Factor -- 5.8 Effect of Dust on Conversion Efficiency -- 5.9 Effect of Dust on Energy Yield -- 5.10 Mechanisms of Removing Dust Particles from PV Module Surfaces -- 5.11 Natural Cleaning Methods -- 5.12 Automatic Cleaning Method -- 5.13 Sun Tracking System -- 6 Conclusions and Recommendations -- References -- Effect of Dust Accumulation on the Power Production of the PV Module at Different Heights: A Case Study -- 1 Introduction -- 2 Materials and Methods -- 2.1 Experimental Setup -- 2.2 Data Measurement -- 3 Results -- 4 Conclusions -- References -- Dust Deposition on PV Module and Its

Characteristics -- 1 Introduction -- 2 Mechanism of Dust Accumulation -- 2.1 Dust Generation -- 2.2 Accumulation of Dust on Solar PV Module Surface -- 3 Allocation of the Various Continent in the Study of Impact of Dust Accumulation -- 4 Elimination of Dust Particle from Solar Photovoltaic Module -- 4.1 Natural Elimination -- 4.2 Cleaning. 4.3 Self-Cleaning Film -- 5 Discussion -- 6 Conclusion -- References -- Photovoltaic Module Dust Cleaning Techniques -- 1 Introduction -- 2 Solar PV Module Dust Cleaning Techniques -- 2.1 Natural Cleaning Method -- 2.2 Machine Cleaning -- 2.3 Passive Cleaning Method -- 3 Conclusion -- References -- Surface Texturing for a Superhydrophobic Surface -- 1 Fundamentals of Superhydrophobic Effect -- 2 Texturing Approaches for Superhydrophobic Surfaces -- 2.1 Chemical and Plasma Etching -- 2.2 Laser Surface Texturing -- 2.3 Lithography -- 2.4 Anodic Oxidation -- 2.5 Electrospinning -- 3 Textured Superhydrophobic Surfaces for Self-Cleaning of PV Modules -- 3.1 Effect of Dust Accumulation on PV Performance of Modules -- 3.2 Textured Self-Cleaning Surfaces for PV Applications -- 4 Summary -- References -- Organic Superhydrophobic Coatings for PV Modules -- 1 Introduction -- 1.1 Superhydrophobic Effect in Nature -- 1.2 Superhydrophobic Characteristics in Plants -- 1.3 Superhydrophobic Characteristics in Animals -- 2 Principles and Properties of Superhydrophobic Surfaces -- 2.1 Wettability, Contact Angle and Surface Roughness -- 2.2 Surface Tension and Surface Energy -- 3 Methods of Preparation of Superhydrophobic Surfaces -- 3.1 Soft Lithography -- 3.2 Template Method -- 3.3 Electro-spinning -- 3.4 Sol-gel -- 3.5 Layer-by-Layer (LbL) -- 3.6 Etching -- 3.7 Chemical Vapor Deposition (CVD) -- 3.8 Electroless Galvanic Deposition -- 3.9 Anodic Oxidation -- 4 Effect of Organic Superhydrophobic Coatings on the Performance of PV Modules -- 4.1 Fluorocarbons -- 4.2 Polysiloxanes -- 4.3 Polyurethane -- 5 Commercialization Challenges and Future Prospects -- References -- Super Hydrophilic Surface Coating for PV Modules -- 1 Introduction -- 2 Cleaning Methods -- 2.1 Self-Cleaning -- 3 Super Hydrophilicity -- 3.1 Photo-Induced Super Hydrophilicity. 4 Fabrication Techniques and Processes for Self-Cleaning Super Hydrophilic Coatings -- 4.1 Sol-gel Process -- 4.2 Hydrothermal Process -- 4.3 Liquid-Phase Deposition -- 4.4 Electrochemical Technology -- 4.5 Dip Coating -- 4.6 Spin Coating -- 5 Modification Methods to Enhance the Self-Cleaning of PV Modules -- 5.1 Doping With Similar Ion -- 5.2 Recombination of Semiconductor -- 6 Applications of Super Hydrophilic Coatings on PV Module -- 6.1 Super Hydrophilic Anti-reflection -- 6.2 Super Hydrophilic Anti-fogging -- 7 Conclusion -- References -- Heat -- Cooling Approaches for Solar PV Panels -- 1 Introduction -- 2 Photovoltaic Panel Heating -- 3 Cooling Approaches for Photovoltaic Panel -- 3.1 Passive Approaches -- 3.2 Active Approaches -- 4 Merit of PV Cooling Approaches -- 5 Conclusions -- References -- Heat Effect on Silicon PV Modules -- 1 Introduction -- 2 Heat effect on Silicon PV Modules -- References -- Thermoelectric Coupled Photovoltaic Modules -- 1 Introduction -- 2 Techniques -- 2.1 Split Method -- 2.2 Direct Couple -- 3 Performance -- 3.1 Direct Coupled PV-TE System -- 3.2 Splitting PV-TE System Performance -- 4 Conclusions -- References -- Photovoltaic Effects of Temperature Compensation Using Thermo-Electric Cooling -- 1 Introduction -- 2 Climatic Variability and Its Effects of Performance on Solar Cells -- 2.1 Effects of Temperature -- 3 The Design, Materials and Temperature Dependencies -- 3.1 Temperature Coefficients of Different Components -- 4 Thermo-Electric Device -- 4.1 Thermo-

Electric Effect -- 4.2 Construction of a Thermo-Electric Device -- 4.3 Coefficient of Performance (COP) -- 5 The Amalgamation of the Solar Cell with the Thermo-Electric Device -- 6 Performance Evaluation and Feasibility Verification -- 7 Conclusion and Recommendations -- References -- Environmental Assessment of Perovskite Solar Cells -- 1 Introduction.

2 Factors Affecting the Performance of the Perovskite Solar Cells -- 2.1

Impact of Moisture on Perovskite Layers -- 2.2 Thermal Stresses

in Perovskite Solar Cell Layers -- 2.3 Optical Instability -- 2.4 Metal

Contacts -- 2.5 Morphological and Structural Instabilities -- 3 Lead

Toxicity -- 4 Outlook -- References -- Influence of Temperature

on Important Characteristics of Photovoltaic Cells -- 1 Physical

Principles of Photovoltaic Energy Conversion -- 2 I-V Characteristics

of Photovoltaic Cells -- 3 Effect of Temperature on Energy Conversion

Efficiency -- 4 Effect of Damage to Photovoltaic Cells on the Parameters

of the Photovoltaic Panel -- References -- Paraffin Wax and Fatty Acid-

Based Passive Temperature Management of PV Modules: An Overview

-- 1 Introduction -- 2 Passive Cooling of PV Modules Using Organic

PCMs -- 2.1 Paraffin Wax-Based Cooling -- 2.2 Fatty Acids-Based

Cooling -- 3 Proposition and Prospects -- 4 Conclusions --

References.
