Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 271-299) and index.
Nota di contenuto	The persistent problem of value -- Philosophy and its fictions -- Deconstruction and religion.
Sommario/riassunto	The last half century has seen both attempts to demythologize the idea of God into purely secular forces and the resurgence of the language of 'God' as indispensable to otherwise secular philosophers for describing experience. This volume asks whether 'piety' might be a sort of irreducible human problem.

2. Record Nr.	UNINA9910522967903321
Autore	Jacobs Allan J.
Titolo	Assigning Responsibility for Children's Health When Parents and Authorities Disagree: Whose Child? / / by Allan J. Jacobs

Sexual And Reproductive Issues II: Departures From Binary Sexual and Gender Viewpoints -- Chapter 14. Genital Rituals: Circumcision -- Chapter 15. Genital Rituals: Female Genital Alteration -- Chapter 16. Conclusion. .
Sommario/riassunto	This book provides a multidisciplinary analysis of the potential conflict between a government's duty to protect children and a parent(s)' right to raise children in a manner they see fit. Using philosophical, bioethical, and legal analysis, the author engages with key scholars in

pediatric decision-making and individual and religious rights theory. Going beyond the parent-child dyad, the author is deeply concerned both with the interests of the broader society and with the appropriate limits of government interference in the private sphere. The text offers a balance of individual and population interests, maximizing liberty but safeguarding against harm. Bioethics and law professors will therefore be able to use this text for both a foundational overview as well as specific, subject-level analysis. Clinicians such as pediatricians and gynecologists, as well as policy-makers can use this text to achieve balance between these often competing claims. The book is written by a physician with practical and theoretical knowledge of the subject, and deep sympathy for the parental and family perspectives. As such, the book proposes a new way of evaluating parental and state interventions in children's' healthcare: a refreshing approach and a useful addition to the literature.
