

1. Record Nr.	UNINA9910523720703321
Autore	Ghorbanzadeh Michael
Titolo	Practical channel-aware resource allocation : with MATLAB and Python code / / Michael Ghorbanzadeh, Ahmed Abdelhadi
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2022] ©2022
ISBN	3-030-73632-6
Descrizione fisica	1 online resource (242 pages)
Disciplina	621.384
Soggetti	Radio resource management (Wireless communications)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Preface -- Introduction -- Contents -- Acronyms -- 1 Quality of Service and Resource Allocation in Communication Systems -- 1.1 Introduction -- 1.2 Current Trends in End-to-End QoS in Cellular Networks -- 1.3 Network Quality of Service Challenges -- 1.4 Focus of This Book -- 1.5 Book High Level Contribution and Organization -- References -- 2 Utility Functions and Radio Resource Allocation -- 2.1 Introduction -- 2.2 Radio Resource Allocation Literature Survey -- 2.3 Application Utility Functions -- 2.3.1 Application Utility Function MATLAB Code -- 2.4 Proportional Fairness and Frank Kelly Algorithm -- 2.5 Chapter Summary -- References -- 3 Resource Allocation Without Channel -- 3.1 Introduction -- 3.2 Resource Allocation: Centralized Architecture and Solution -- 3.2.1 Centralized Architecture Simulation -- 3.2.2 Centralized Resource Allocation in Real-World Implementation -- 3.2.3 MATLAB Code for Centralized Resource Allocation -- 3.3 Resource Allocation: Distributed Architecture and Solution -- 3.3.1 Distributed Resource Allocation Simulation -- 3.3.2 MATLAB Code for Distributed Resource Allocation -- 3.4 Mathematical Equivalence -- 3.5 Distributed or Centralized -- 3.6 Benchmark Comparison -- 3.7 Chapter Summary -- References -- 4 Radio Resource Block Allocation -- 4.1 Introduction -- 4.2 Continuous Optimization Relaxation -- 4.3 Radio Resource Block Allocation Optimization and Solution -- 4.3.1 Radio Resource Block Allocation Simulation Results -- 4.3.2 RB Allocation MATLAB Code -- 4.4 Chapter

Summary -- References -- 5 Resource Allocation with Channel -- 5.1
Introduction -- 5.2 Channel Quality, Modulation, and Coding -- 5.3
Radio Resource Management -- 5.4 Resource Allocation Efficacy and
Channel Conditions -- 5.5 Channel-Aware Distributed Resource
Allocation Formulation -- 5.5.1 Determining -- 5.5.2 Determining K.
5.6 Global Solution Existence -- 5.6.1 Solution for Channel-Aware
EURA Optimization -- 5.6.2 IURA Global Optimal Solution -- 5.7
Simulation Results -- 5.7.1 MATLAB Code -- 5.8 Chapter Summary --
References -- 6 Propagation Modeling -- 6.1 Introduction -- 6.2
Geodesic Calculations -- 6.3 Databases -- 6.3.1 Terrain Profile --
6.3.2 Surface Refractivity and Climate -- 6.4 ITM Propagation Pathloss
-- 6.5 Python Code -- 6.5.1 Code Base Installation -- 6.5.2
Propagation Code Run -- 6.6 Chapter Summary -- References -- 7
Channel-Aware Resource Allocation Large Scale Simulation -- 7.1
Introduction -- 7.2 Large Scale Network Simulation -- 7.3 Chapter
Summary -- References -- 8 Book Summary -- Index.
