| 1. Record Nr. | UNINA9910523747903321 |
| Titolo | Evolutionary and memetic computing for project portfolio selection and scheduling // Kyle Robert Harrison [and five others] editors |
| Pubbl/distr/stampa | Cham, Switzerland : , : Springer, , [2022] ©2022 |
| ISBN | 3-030-88315-9 |
| Descrizione fisica | 1 online resource (218 pages) : VIII, 214 p. 52 illus., 24 illus. in color |
| Collana | Adaptation, Learning and Optimization ; ; Volume 26 |
| Disciplina | 006.3823 |
| Soggetti | Evolutionary computation Computer scheduling |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Nota di contenuto | Intro -- Preface -- Contents -- Evolutionary and Memetic Computing for Project Portfolio Selection and Scheduling: An Introduction -- 1 Introduction -- 2 Problem Formulation -- 3 Solution Methodologies -- 3.1 Mathematical Optimization -- 3.2 Evolutionary Computation -- 3.3 Memetic Computing -- 4 Summary of Chapters -- 5 Guide for Readers -- References -- Evolutionary Approaches for Project Portfolio Optimization: An Overview -- 1 Introduction -- 2 Problem Description -- 2.1 Public and Social Projects -- 2.2 Software/IT Projects -- 2.3 R&D and Production Projects -- 2.4 Construction and Infrastructure Projects -- 2.5 Investment Projects -- 2.6 Defense Projects -- 2.7 Summary of Problem Descriptions -- 3 Problem Formulation -- 3.1 Basic Problem Formulation -- 3.2 Public and Social Projects -- 3.3 Software/IT Projects -- 3.4 R&D and Production Projects -- 3.5 Construction and Infrastructure Projects -- 3.6 Investment Projects -- 3.7 Defense Projects -- 3.8 Summary of Formulations -- 4 Solution Approaches -- 4.1 Public and Social Projects -- 4.2 Software/IT Projects -- 4.3 R&D and Production Projects -- 4.4 Construction and Infrastructure Projects -- 4.5 Investment Projects -- 4.6 Defense Projects -- 4.7 Summary of Solution Approaches -- 5 Summary -- References -- An Introduction to Evolutionary and Memetic Algorithms for Parameter Optimization -- 1 Introduction -- 2 Comparison Between EAs and Classical |

Optimization Methods -- 2.1 Robustness -- 2.2 Efficiency -- 3
Building Blocks of EAs -- 4 Genetic Algorithm -- 4.1 Initialization --
4.2 Selection -- 4.3 Crossover -- 4.4 Mutation -- 4.5 Population
Update -- 4.6 Stopping Criteria -- 5 Evolution Strategies -- 5.1
Selection -- 5.2 Recombination -- 5.3 Mutation -- 5.4 Adjusting the
Mutation Profile -- 6 Evolutionary Programming -- 7 Differential
Evolution -- 7.1 Mutation.
7.2 Crossover -- 7.3 Selection -- 7.4 Recent Variants -- 8 Other
Relevant Methods -- 9 Memetic Algorithms -- 10 Summary and
Conclusions -- References -- An Overall Characterization of the Project
Portfolio Optimization Problem and an Approach Based on Evolutionary
Algorithms to Address It -- 1 Introduction -- 2 A Review of the Project
Portfolio Selection Process -- 2.1 Phases in the Project Portfolio
Selection Process -- 2.2 Characterizing a Plausible Project Portfolio
Selection Approach -- 3 Problem Statement -- 3.1 Problem Description
-- 3.2 An Illustrative Example -- 3.3 Problem Formalization -- 4 An
Overall Approach to Project Portfolio Selection -- 4.1 Framework of the
Approach -- 4.2 Coping with Imperfect Information on the Criteria
Impacts -- 4.3 Representing Preferences -- 4.4 Using Evolutionary
Algorithms to Optimize Portfolios -- 5 Conclusions and Future Work --
References -- A New Model for the Project Portfolio Selection and
Scheduling Problem with Defence Capability Options -- 1 Introduction
-- 2 Background -- 2.1 The Knapsack Problem -- 2.2 Evolutionary
Meta-Heuristic Approaches -- 2.3 Differential Evolution -- 3 Problem
Formulation -- 3.1 Analysis of Problem Formulation -- 3.2 NP-
Hardness -- 3.3 Sample Problem Data -- 3.4 Similarity to Existing
Problems -- 4 Heuristic Solution Approach -- 5 Experimental Design
-- 5.1 Synthetic Problem Instance Generation -- 5.2 Problem Instances
-- 5.3 Algorithmic Control Parameters -- 5.4 Statistical Analysis -- 6
Results -- 6.1 Validating the Solution Approaches -- 6.2 Effect of
Seeding -- 6.3 Main Results -- 6.4 Summary -- 7 Conclusions and
Future Work -- References -- Analysis of New Approaches Used in
Portfolio Optimization: A Systematic Literature Review -- 1 Introduction
-- 2 Research Method -- 2.1 Research Questions -- 2.2 Search Sources
-- 2.3 Inclusion Criteria and Exclusion Criteria.
2.4 Data Extraction -- 2.5 Data Analysis -- 2.6 Deviations in the
Protocol -- 3 Results -- 3.1 Journal Impact Factor -- 3.2 Classification
of Methods -- 4 Discussion -- 4.1 Which Key Methods, Tools, or
Optimization Techniques Are Used in the Portfolio Optimization
Problem? -- 4.2 Which Realistic Constraints Are Used? -- 4.3 What
Type of Analysis Is Done Regarding the Stock: Fundamental, Technical,
or Mixed (Fundamental and Technical)? -- 4.4 Which
Software/Programming Languages Are Used? -- 4.5 Recent Researches
-- 5 Conclusions -- 6 Research Gaps -- References -- A Temporal
Knapsack Approach to Defence Portfolio Selection -- 1 Introduction --
2 Project and Portfolio Selection in DoD -- 3 Problem Formulation --
3.1 Inherent Solution Challenges -- 4 Implementation in Microsoft
Excel® -- 5 Performance and Budget-Value Trade-Offs -- 5.1
Relaxation -- 5.2 Value-Slack Trade-Offs and the Issue of Sensitivity --
6 Discussion and Future Work -- References -- A Decision Support
System for Planning Portfolios of Supply Chain Improvement Projects in
the Semiconductor Industry -- 1 Introduction -- 2 Literature -- 3
Decision Making Framework and Integer Programming Model -- 4
Decision Support System -- 5 Case Study -- 6 Conclusions and Future
Research -- References -- Index.
