Sommario/riassunto	Rabbi Shimon ben Zemach Duran (1361-1444) was a colorful rabbinic authority in Algiers. In his book, Zohar Harakia, on methods of enumerating the 613 commandments, he summarizes the work of previous authorities on this subject, especially Maimonides and Nachmanides. He also presents his own system of enumeration. Thus, his work is a compact introduction to this fundamental subject. The text, first printed in 1515, is written clearly and arranged as a commentary on ibn Gabirol's poetic version of the 613 commandments, which is chanted on Shavuot. This English translation and notes make it accessible to lay readers as well as students of Jewish law, liturgy, and medieval Jewish history.

Sommario/riassunto	Offering the first developed account of political liberal education, this book combines a thorough analysis of the theoretical groundwork of political liberal education with application-oriented approaches to contemporary educational challenges. Following in depth engagement with the shortcomings of Rawls' theory and addressing some key objections to neutrality-based restrictions in education, the volume moves on to provide an insightful discussion of topics such as same-sex relations in sex-education, the position of migrant children and the rights of religious parents to determine the education of their children.

This book outlines a political liberal account of education which provides a useful contribution to the current debates about liberalism and education in a way unprecedented in the literature on political liberalism so far. It is of interest to anyone working at the intersection of political philosophy and philosophy of education as well as for scholars with a broader interest in how liberalism can respond to the challenges of value pluralism.
