

1. Record Nr.	UNINA9910523801403321
Titolo	Shaping for cleaning the root canals : a clinical based strategy // Gustavo De Deus [and four others], editors
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2022] ©2022
ISBN	3-030-84617-2
Descrizione fisica	1 online resource (376 pages)
Disciplina	617.6342
Soggetti	Endodontics Dental pulp cavity Dentistry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Intro -- Foreword -- Preface -- Contents -- Contributors -- 1: Classical Cleaning & Shaping: Historical Cornerstones -- 1.1 Historical Development of Shaping Concepts -- 1.2 Classical Cleaning & Shaping Concept by Schilder -- 1.3 From the 1980s to the 1990s -- 1.4 Overfast Mechanical Shaping: An Undeniable Current Reality -- 1.5 What Should Be the Main Target in Endodontics? Speed or Quality? -- References -- 2: Shaping for Cleaning: Reconsidering Root Canal Debridement -- 2.1 How Effectively Can We Debride? -- 2.1.1 The "Fake Iceberg Illusion" -- 2.1.2 Debridement Deficit -- 2.1.3 Unnecessary Root Dentin Removal -- 2.1.4 Accumulated Hard-Tissue Debris -- 2.2 The Overload on the Shoulders of Irrigation -- 2.3 The Shaping for Cleaning Concept -- 2.4 What to Do After Shaping? Maximizing the NaOCl Intracanal Time -- 2.4.1 NaOCl as a Non-agitated Intra-Visit Medication -- 2.4.2 Updated Syringe-Needle Irrigation: A Close-to-WL Approach -- 2.4.3 Handling the Vapor Lock Phenomenon -- 2.4.4 The Role of the Patency File -- 2.4.5 Negative Apical Pressure Irrigation -- 2.4.6 Is It Still Necessary to Agitate the NaOCl? -- 2.4.6.1 Sonic and Ultrasonic Irrigation -- 2.4.6.2 Manual Dynamic Activation (MDA) Technique -- 2.4.6.3 Continuous Instrumentation and Irrigation: The Self-Adjusting File (SAF) System -- 2.4.7 Chelating Agents: Washing out the Biofilm?

-- 2.5 Shaping for Cleaning Irrigation: Clinical Guidelines --
References -- 3: The Glide Path Matter -- 3.1 Introduction -- 3.2
Definitions -- 3.2.1 Natural Path -- 3.2.2 Canal Scouting -- 3.2.3
Apical Patency -- 3.2.4 Glide Path -- 3.3 Micro Glide Path -- 3.3.1
Guidelines for Canal Scouting -- 3.3.2 Guidelines for Establishing
the Apical Patency -- 3.3.3 Challenges in Scouting and Patency
Procedures -- 3.3.3.1 Easily Negotiable Root Canals.
3.3.3.2 Root Canals with Difficult Negotiation -- 3.3.3.3 Non-
negotiable Apical Canal Anatomies -- 3.4 The Glide Path Per Se --
3.4.1 Manual Glide Path Preparation -- 3.4.2 Glide Path Using Hand
Files in Dedicated Oscillatory Pneumatic Contra-Angles -- 3.4.3 Rotary
NiTi Glide Path Preparation -- 3.4.3.1 PathFile -- 3.4.3.2 ScoutRaCe
-- 3.4.3.3 ProGlider -- 3.4.3.4 The Critical Role of Micro Glide Path
for Rotary Pathfinder Instruments -- 3.4.4 Reciprocating NiTi Glide
Path Preparation -- 3.4.4.1 WaveOne Gold Glider -- 3.4.4.2 R-Pilot --
3.5 Concluding Remarks -- References -- 4: NiTi Rotary Systems:
From Revolution to the "More of the Same" Phenomenon -- 4.1 Nickel-
Titanium Alloy: History and Properties -- 4.2 NiTi Alloys and Specific
Features -- 4.2.1 Austenitic NiTi Alloy -- 4.2.1.1 Conventional NiTi
Alloy -- 4.2.1.2 Electropolishing Treatment -- 4.2.1.3 M-Wire --
4.2.1.4 R-Phase -- 4.2.2 Martensitic NiTi Alloy -- 4.2.2.1 CM-Wire
-- 4.2.2.2 Electrical Discharge Machining -- 4.2.2.3 Gold and Blue
Wires -- 4.2.3 MaxWire -- 4.3 The Genealogical Tree of NiTi Systems
-- 4.3.1 The Patriarchs (First Generation) -- 4.3.2 Improving
Metallurgical Properties (Second Generation) -- 4.3.3 Heat Treatment
Is the Pathway to Follow! (Third Generation) -- 4.3.4 No! Kinematic Is
Better (Fourth Generation) -- 4.3.5 The Asymmetrical Proposition (Fifth
Generation) -- 4.4 Clinical Recommendations for Safe Use -- 4.5
Rotary NiTi Systems: "The MORE of the SAME" Phenomenon --
References -- 5: Reciprocating Movement: Mastering the Mechanical
Preparation -- 5.1 Reciprocating Steel Instruments: The First
Beginning! -- 5.2 Asymmetric Angles: The Rebirth of Reciprocating
Movement -- 5.2.1 The Story of Reciprocating Movement with NiTi
Instruments -- 5.3 Reciprocating Systems -- 5.3.1 Reciproc M-Wire.
5.3.1.1 Manufacturer Guidelines (Fig. 5.12) -- 5.3.2 Reciproc Blue --
5.3.3 WaveOne Gold -- 5.3.3.1 Manufacturer Guidelines (Fig. 5.17) --
5.3.4 Race Evo R-Motion -- 5.3.4.1 Manufacturer Guidelines
(Fig. 5.19) -- 5.4 Reciprocating Motors -- 5.4.1 Dedicated Electronic
Motors -- 5.4.2 Air-Driven Contra-Angle -- 5.5 The R25:
A Multitasking Single-File Instrument -- 5.5.1 Is Reciproc a Single-Use
Instrument? -- 5.5.2 Reciprocation and the Coronal Preflaring
Procedure -- 5.5.3 Is Glide Path Mandatory for Canal Preparation
with Reciprocating Movement? -- 5.5.4 Feedback of the R25
Instrument -- 5.6 Finally, Low Risk of Fracture! -- 5.7 Rational
Approach for Reciprocating Preparation of Root Canals: A Clinical
Perspective -- 5.7.1 Main Reasons for Using Reciprocating Instruments
-- 5.7.2 A Simple and Easy to Learn Workflow -- 5.8 Concluding
Remarks: Reasons Why Reciprocation Is Not "More of the Same" --
References -- 6: Scientific and Educational Aspects of Reciprocating
Movement -- 6.1 Introduction -- 6.2 Scientific Aspects
of Reciprocating Movement -- 6.2.1 Cyclic Fatigue Resistance -- 6.2.2
Torsional Resistance -- 6.2.3 Cutting Efficiency -- 6.2.4 Shaping
Ability -- 6.2.5 Microcrack Formation -- 6.2.6 Preparation Time --
6.2.7 Accumulated Hard Tissue Debris and Debris Extrusion -- 6.2.8
Disinfection Ability: Reduction of Bacterial Load and Toxins -- 6.2.9
Clinical Performance: Postoperative Pain -- 6.3 Educational Aspects
of Reciprocating Movement -- References -- 7: Shaping for Cleaning
in Retreatment Cases -- 7.1 Introduction -- 7.1.1 Predictability

of the Initial Endodontic Treatment -- 7.1.2 Success and Clinical Practice -- 7.1.3 Purpose of Retreatment -- 7.1.4 The Filling Materials -- 7.2 When Is Retreatment Possible? -- 7.2.1 Access Preparation and Retreatment. 7.2.2 The Critical Last Millimeters: Regaining the Apical Patency -- 7.2.3 Anatomical Diameter of the Apical Foramen: To Enlarge or Not to Enlarge? -- 7.3 Effects of Gutta-Percha Removal in the Canal Walls -- 7.3.1 Getting Rid of the Bulk-Filling Material: Solvent, Burs, and Files -- 7.3.2 Challenges: Oval Canals, Irregularities, and Isthmuses -- 7.4 Root Canal Reshaping -- 7.4.1 Vertical Extent of Instrumentation -- 7.4.2 Which Is the Best File for Retreatment? -- 7.4.3 Interappointment Medication: Actual Scientific Status -- 7.5 Suggested Clinical Protocol -- 7.5.1 Case Planning: Anatomical Knowledge with 3D Visualization of the Canals -- 7.5.2 Instruments and Materials -- 7.5.3 New Instruments and Approaches to Deal with the Remaining Gutta-Percha -- 7.5.4 Main Clinical Protocol -- 7.5.4.1 Removal of the Bulk Filling Material (Fig. 7.15) -- 7.5.4.2 Regain Apical Patency (Fig. 7.16a, b) -- 7.5.4.3 Reshaping the Canals at the Established Working Length (Fig. 7.16c) -- 7.6 Final Considerations -- 7.6.1 How to Determine the Outcome in Retreatment Cases -- 7.6.1.1 Healing: Grouped into Two Types -- 7.6.1.2 Disease -- 7.6.2 Selective Root Canal Retreatment -- References -- 8: Managing Canal Anatomies in the Context of Shaping for Cleaning Proposal -- 8.1 The Importance of Anatomical Knowledge of Root Canals in Clinical Practice -- 8.2 Applied Anatomy: What We Really Need to Know About Each Group of Teeth -- 8.2.1 Root Canal Complexities: Rule or Exception? -- 8.2.2 One Root Means a Single Canal? -- 8.2.3 Anterior Teeth: Are They the Easiest Teeth to Treat? -- 8.2.4 The Hidden Secrets of Premolars -- 8.2.5 The Complexities of Molar Teeth -- 8.2.6 The "Critical Apical Zone": Is It Really Critical? -- 8.3 Anatomical Factors and Their Impact on the Prognosis of Root Canal Treatment. 8.4 Anatomical Factors in Practice for Treating Complex Anatomies -- 8.4.1 Diagnostic Tools to Identify Anatomical Complexities: 2D x 3D -- 8.4.2 Planning a Case: Armamentarium for a 3D Approach -- 8.4.3 Access Preparation: To Open or Not to Open? -- 8.4.3.1 Minimally Invasive Endodontics: A Cost-Benefit Rationale -- 8.4.4 Cleaning and Shaping or Shaping for Cleaning? -- 8.4.5 3D or 4D Canal Filling? -- 8.5 Dealing with Complex Cases -- 8.5.1 Multiplanar Curvatures: What You See Is Not What You Get! -- 8.5.2 Overcoming Preparation of Multiple Canals in Narrow Roots -- 8.5.3 The Challenge of C-Shaped Canal Management -- 8.5.4 Taurodontism: Expanding the Pulp Chamber Size -- 8.5.5 Extra Roots in Maxillary and Mandibular Molars: The Radix -- 8.5.6 The Dens Invaginatus Dilemma: Conservative and/or Surgical Approach? -- 8.5.7 MB2 Again? Yes, But Let's Also Talk About the MB3! -- 8.6 Concluding Remarks -- References.
