Sommario/riassunto	No environment on Earth imposes greater physical and biological constraints on life than the deep oceanic midwaters. Near-freezing temperatures, the absence of sunlight, enormous pressure, and a low food supply make habitation by any living thing almost inconceivable. Yet 160 species of anglerfishes are found there in surprising profusion. Monstrous in appearance, anglerfishes possess a host of unique and spectacular morphological, behavioral, and physiological innovations. In this fully illustrated book, the first to focus on these intriguing fish, Theodore W. Pietsch delivers a comprehensive summary of all that is known about anglerfishes-morphology, diversity, evolution, geographic distribution, bioluminescence, and reproduction.

Sommario/riassunto

Presents a comprehensive picture of care, including diagnostic, therapeutic, and psychosocial aspects. The contributors cover basic science and epidemiological aspects of the public health challenge, but maintain a focus on the day to day issues encountered in dealing with affected people. Containing clear, practical advice, this text is an essential, practical resource to bridge the gap between expensive reference texts and smaller manuals. Practical Management of Haemoglobinopathies is an ideal for; Trainees and residents in haematology

Sommario/riassunto	Toute une serie de craintes et de problemes, mais aussi d'attentes et de promesses, sont soulevés au Quebec et ailleurs dans les pays occidentaux au sujet de la question du temps hors travail. L'auteur presente dans cet ouvrage une sociologie generale, englobant a la fois celle du temps libre, du loisir, du jeu et du sport, qui peut etre deployee dans ce vaste champ d'investigation qu'est la sociologie du temps hors travail, propre a la fois a restructurer les assises theoriques et renouveler les recherches empiriques.
