Sommario/riassunto	Despite the significant work carried out on the text, transmission, materiality, and scribal habits preserved in the Chester Beatty Biblical Papyri since their acquisition by Beatty ninety years ago in 1931, these early copies of Jewish scripture and the New Testament have, for the most part, belonged primarily to textual critics. The goal of this book is to resituate this important collection of manuscripts in broader contexts, examining their significance in conversation with papyrology

as a discipline, in the context of other ancient literary traditions preserved on papyri, and in discussion with the intellectual and cultural history of collecting, colonialism, and scholarly rhetoric. The Chester Beatty Biblical Papyri, and other papyrological collection with which they are inextricably bound, remind us of the critical value of examining old manuscripts afresh in their historical, scholarly, and intellectual contexts. These studies are relevant for all scholars who work with manuscripts and ancient texts of any variety.

Sommario/riassunto	Leopold's original bibliography of 1952 was considered to deal with a rather esoteric branch of psycholinguistics. Since then, however, an explosion of research in the field has occurred, which this new revision accurately reflects. To a judicious selection from the old work Mr. Slobin has added 763 new items, standardizing the reference format and adding a unique computerized concordance. Leopold's

Bibliography of Child Language is an invaluable reference work in child language study.
