

1. Record Nr.	UNINA9910524855703321
Autore	Burger Edward J., Jr., <1933->
Titolo	Science at the White House : A Political Liability / / Edward J. Burger, Jr
Pubbl/distr/stampa	Johns Hopkins University Press
ISBN	0-8018-2433-8 1-4214-3453-9
Edizione	[1st ed.]
Descrizione fisica	1 online resource (1 online resource (xxi, 180 pages :) : graphs)
Disciplina	338.973
Soggetti	Science Medical policy Political science Presidents - United States Science and state - United States Project Muse Electronic books. United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Originally published in 1980
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Science advice for the President: a perspective -- National health policy -- Health-related research and development -- The environment, health, and regulation to protect health -- Population and family planning.
Sommario/riassunto	Originally published in 1980. In 1973 the US president's Office of Science and Technology was eliminated, a victim of its own incongruity. It was not, as was popularly proclaimed at the time, simply because the Nixon administration was particularly hostile to the scientific and academic communities. It was eliminated, argues physician-scientist Edward J. Burger Jr., because the office had tried to do its job too well—and had become a political liability. Science at the White House takes a critical look at the role of science advisers to the president and recounts the many conflicts that occurred as science and politics converged. Burger draws on his own six years of experience in the White House Office of Science and Technology in the 1970s. His book is

filled with firsthand descriptions of the government's handling of such issues as national health care, environmental regulation, population control, and biomedical research.
