Sommario/riassunto	Maxwell presents the results of her groundbreaking survey of 405 employers, which queried them about jobs requiring no more than a high school education and no more than one year of work experience. These data allow her to establish the link between skills and low-skilled jobs and to reveal the current state of the labor market facing low-skilled workers. The data also highlights the knowledge and skills that employers require in low-skilled jobs and the abilities that individuals who apply for those jobs bring to the table.
