Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index. EBL Purchase 3 copies
Nota di contenuto	1. the foundational concepts of clinical practice 2. chemical and biochemical foundations 3. molecular biology, genetics, and genetic diseases 4. cell physiology and pathophysiology 5. infectious disease 6. the immune system and leukocyte function 7. neoplasia 8. blood and clotting 9. circulation 10. heart 11. lungs 12. kidneys 13. gastrointestinal tract 14. liver 15. nervous system 16. musculoskeletal system 17. endocrine system
Sommario/riassunto	This advanced physiology and pathophysiology text is designed to address the specific learning needs of future nurse practitioners, physician assistants, and other advanced healthcare providers caring for patients across the lifespan. Focusing on practical applications of physiology, it facilitates in-depth understanding of important pathophysiological concepts as they relate to major disorders

commonly seen in clinical practice and includes comprehensive pediatric and geriatric considerations. This knowledge is crucial to providing the foundation required to be an informed and confident clinical decision maker.
